

# Waste King

## DISPOSER SINK TOP SWITCH WITH FIBER OPTIC

# Add Fashion and Convenience to the Kitchen

Conveniently operate your garbage disposer with a Sink Top Switch available only from Waste King. A great alternative to a wall switch, it is activated by a Fiber Optic beam of light, easily mounts to any sink or solid surface counter top, and conveniently puts the disposer on/off within easy reach.

The Waste King Sink Top Switch with Fiber Optic is perfect for islands or other installations where a wall switch is inconvenient. It works with any disposer, and its two outlets provide a great power source for another appliance such as an instant hot water dispenser.

## Sink Top Switch

With Fiber Optic exclusively from Waste King

- *Convenient alternative to a wall switch*
- *Easily mounts in a standard sink hole or on a counter top with a low profile look*
- *Perfect for island installations*
- *Simple touch for on/off — saves finger nails with no pressure required*
- *20-second automatic shut-off*
- *Includes both satin nickel and white touch buttons*

# Easy to install and easy to use

The very low profile on/off switch adds a touch of elegance in the new kitchen. The UL approved Sink Top Switch with Fiber Optic looks great and installs quickly and easily without an electrician.

### Here's how the Sink Top Switch with Fiber Optic works:

The remote touch button uses a fiber optic light beam to activate the electronic switch, located under the sink. When touched, the Sink Top Switch with Fiber Optic sends a beam of light down to activate the remote switch which activates the disposer.

### Typical Installation

Model 1032HE

### The Sink Top Switch with Fiber Optic kit includes:
