### Important Safety Instructions

Warnings and safety instructions appearing in this guide are not meant to cover all possible conditions and situations that may occur. Common sense, caution, and care must be exercised when installing, maintaining, or operating this appliance.

---

**CAUTION**

**CAUTION**—Hazards or unsafe practices which could result in personal injury or property or product damage.

---

**WARNING**

**WARNING**—Hazards or unsafe practices which could result in personal injury.

---

**NOTE**

**NOTE**—Important information to make a problem free installation.
UNPACKING YOUR REFRIGERATED DRAWERS

Remove Packaging
Your refrigerated drawers have been packed for shipment with all parts that could be damaged by movement securely fastened. Cut the banding material at the bottom of the carton, unfold the cartoning at the bottom and remove the carton from the appliance. Remove the plastic bag, styrofoam corner posts and any tape holding the drawers closed and internal components in place. The owners manual is shipped inside the drawer in a plastic bag along with the warranty registration card.

Important
Keep your carton packaging until your refrigerated drawers have been thoroughly inspected and found to be in good condition. If there is damage, the packaging will be needed as proof of damage in transit. Afterwards please dispose of all items responsibly in particular the plastic bags which can be a suffocation hazard.

Note to Customer
This merchandise was carefully packed and thoroughly inspected before leaving our plant. Responsibility for its safe delivery was assumed by the retailer upon acceptance of the shipment. Claims for loss or damage sustained in transit must be made to the retailer.

DO NOT RETURN DAMAGED MERCHANDISE TO THE MANUFACTURER - FILE THE CLAIM WITH THE RETAILER.

Warranty Registration
It is important you send in your warranty registration card immediately after taking delivery of your refrigerated drawers or you can register online at www.marvelrefrigeration.com.

The following information will be required when registering your unit:
Model Number
Serial Number
Date of Purchase
Dealers name and address

The model number and serial number can be found on the serial plate which is located on the bottom of the cabinet liner in the left front corner. Open the bottom drawer to full extension to view it.

CAUTION

Help Prevent Tragedies
Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous - even if they sit out for “just a few days”.

If you are getting rid of your old refrigerator, please follow the instructions below to help prevent accidents.

Before you throw away your old refrigerator or freezer:
• Take off the doors or remove the drawers.
• Leave the shelves in place so children may not easily climb inside.
INSTALLING YOUR REFRIGERATED DRAWERS

Select Location
The proper location will ensure peak performance of your appliance. We recommend a location where the unit will be out of direct sunlight and away from heat sources. To assure your product performs to specifications the recommended installation location temperature range is from 55 to 100°F (13 to 38°C).

Outdoor Installation
Only the 6ORDE model is suitable for outdoor installations. A ground fault circuit interrupter electrical receptacle is to be used to supply electrical power to the refrigerator for outdoor applications. Contact an electrician if you need to install one to supply electrical power to your outdoor refrigerator. Do not install in an environment where the unit will be exposed to direct sun exposure as this may result in unsatisfactory performance.

Cabinet Clearance
Ventilation is required from the bottom front section of the unit. Keep this area open and clear of any obstructions. Adjacent cabinets and countertop can be installed around the unit as long as the grille and drawer access remain unobstructed.

Front Grille
Do not obstruct the front grille. The openings within the front grille provide air to flow into and exit from the refrigerator condenser. For this reason it is important this area to not be obstructed and be kept clean. Marvel does not recommend the use of custom made grilles as air flow may be restricted because of inadequate openings. (See Figure 1).

Leveling Legs
Adjustable legs at the front and rear corners of the unit should be set so the unit is firmly positioned on the floor and level from side to side and front to back. Turn leveling legs clockwise to raise unit, counterclockwise to lower it. (See Figure 1).

Do not splash or spray water from a hose on the refrigerator! Doing so may cause an electrical shock, which may result in severe injury or death.

This unit should not, under any circumstances, be ungrounded.

Grounding Method
This product is factory equipped with a power supply cord that has a three-pronged, grounded plug. It must be plugged into a mating grounding type receptacle in accordance with the National Electrical Code and applicable local codes and ordinances (see Figure 2). If the circuit does not have a grounding type receptacle, it is the responsibility and obligation of the customer to exchange the existing receptacle in accordance with the National Electrical Code and applicable local codes and ordinances. The third ground prong should not, under any circumstances, be cut or removed.

Electrical Connection
115 volts, 3.3 amps running max. 15 amp dedicated circuit required. 3 prong grounded receptacle required.

Do not use an extension cord with this appliance.
INSTALLING THE ANTI-TIP DEVICE

CAUTION

Anti - Tip Device

A cabinet “anti–tip” device is mounted to the back of your refrigerated drawer unit. If your installation is a built-in undercounter application with a countertop directly above the unit this item can be removed, it does not need to be applied. If your unit is a freestanding application with no countertop directly above the top of the unit, you must apply this feature to prevent the unit from tipping forward when the drawers are pulled out. The anti–tip device is installed on the back of the unit. The anti–tip device reduces the chance of personal injury as well as property damage when properly installed between the back of the unit and the adjacent wall. Please see the following instructions for installing the anti-tip device.

1. Push the unit against the wall so the anti-tip bracket is flush to the wall adjacent to the back panel. Level the unit with the leveling legs provided in the cabinet bottom. (See Leveling Legs on page 3).

2. Using a pencil and the bracket as a template, trace the bracket on the wall, making sure 2 of the screw holes are aligned with a stud in the wall.

3. Pull the unit away from the wall.

4. Remove the screws that connect the upper and lower sections of the anti-tip bracket.

5. Place the bracket on the wall and mark and drill 3/16” dia. Pilot holes for the provided 1/4” lag screws. Mount the lower section to the wall with the 1/4” lag screws.

6. Move the unit into place aligning the screw holes between the upper and lower brackets and secure with the screws removed in step 4.
Recommended Rough In Opening Dimensions, Indoor Model 60RDE

- **Anti tip Bracket** must be installed for freestanding applications. Can be removed for built in applications.

- **Front and Rear Leveling Legs**

- **Dimensions Indoor Model 60RDE**
  - 23-7/8" (60.7 cm)
  - 24-1/4" (61.6 cm)
  - 22" (55.9 cm)
  - 1-7/8" (4.8 cm)

- **Electrical Requirements**: 115 volts, 3.3 amps running max. 15 amp dedicated circuit required. 3 prong grounded receptacle required. Power outlet can be located in the back wall behind unit. Add 1" to depth for thickness of plug, or recess outlet 1" into the wall. Power outlet can also be installed in adjacent cabinetry with a cutout for routing of power cord. Follow all local building codes when installing electrical and unit.

- **Product weight**: 170 lbs. (77.1 kg.)

*Depth dimension may vary depending on each individual installation.*
Recommended Rough In Opening Dimensions, Indoor Model 60RDE Overlay Door

- **23-7/8” (60.7 cm)**
- **34-1/4” to 34-1/2” (87 to 87.6 cm)**
- **Anti tip Bracket must be installed for freestanding applications. Can be removed for built in applications.**
- **Front and Rear Leveling Legs**
- **Drawer fully opened 45-1/8” Not including (114.6 cm) custom panel**
- **23-3/8” Not including (59.4 cm) custom panel**
- **1-7/8” (4.8 cm)**

**Electrical Requirements:**

- 115 volts, 3.3 amps running max. 15 amp dedicated circuit required. 3 prong grounded receptacle required.
- Power outlet can be located in the back wall behind unit. Add 1” to depth for thickness of plug, or recess outlet 1” into the wall. Power outlet can also be installed in adjacent cabinetry with a cutout for routing of power cord. Follow all local building codes when installing electrical and unit.

**Product weight = 170 lbs. (77.1 kg.)**

*Depth dimension may vary depending on each individual installation.*
Dimensions for Outdoor Model 6ORDE

Recommended Rough In Opening Dimensions, Outdoor Model 6ORDE

Dimensions:
- 23-7/8" (60.7 cm)
- 24-1/4" (61.6 cm)
- 26-3/8" (67 cm)
- 22" (55.9 cm)
- 1-7/8" (4.8 cm)

Front and Rear Leveling Legs:
- 1-7/8" (4.8 cm)
- 24" (61 cm)
- 34-1/2" (87.6 cm)
- 46" (116.8 cm)
- 48-1/8" (122.2 cm)

Anti tip Bracket must be installed for freestanding applications. Can be removed for built in applications.

A ground fault circuit interrupter electrical receptacle is to be used to supply electrical power to the refrigerator for outdoor applications. Contact an electrician if you need to install one to supply electrical power to your outdoor refrigerator.

Product weight = 170 lbs. (77.1 kg.)

Electrical Requirements: 115 volts, 3.3 amps running max. 15 amp dedicated circuit required. 3 prong grounded receptacle required.

Power outlet can be located in the back wall behind unit. Add 1" to depth for thickness of plug, or recess outlet 1" into the wall. Power outlet can also be installed in adjacent cabinetry with a cutout for routing of power cord. Follow all local building codes when installing electrical and unit.

Alternate outlet location in adjacent cabinetry.

*Depth dimension may vary depending on each individual installation.
Dimensions for Indoor Model 80RDE

Recommended Rough In Opening Dimensions, Indoor Model 80RDE

- **Recommended Rough In Opening Dimensions**
  - Front and Rear Leveling Legs: 1-7/8" (4.8 cm)
  - 24-1/4" (61.6 cm)
  - 22" (55.9 cm)
  - 26-3/8" (67 cm)
  - 1-7/8" to 34-1/2" (87 to 87.6 cm)
  - 29-7/8" (75.9 cm)
  - 34-1/4" to 34-1/2" (87 to 87.6 cm)
  - 46" Drawer fully opened (116.8 cm)
  - 48-1/8" Drawer fully opened (122.2 cm)

- **Anti tip Bracket** must be installed for freestanding applications. Can be removed for built in applications.

- **Electrical Requirements**: 115 volts, 3.3 amps running max. 15 amp dedicated circuit required. 3 prong grounded receptacle required.
  - Power outlet can be located in the back wall behind unit. Add 1” to depth for thickness of plug, or recess outlet 1” into the wall. Power outlet can also be installed in adjacent cabinetry with a cutout for routing of power cord. Follow all local building codes when installing electrical and unit.

- **Product weight**: 195 lbs. (88.4 kg.)

- **Alternate outlet location** in adjacent cabinetry.

- **WARNING**

*Depth dimension may vary depending on each individual installation.*
Dimensions for Indoor Model 80RDE Overlay Door

Recommended Rough In Opening Dimensions, Indoor Model 80RDE Overlay Door

30" (76.2 cm)

34-1/2" (87.6 cm)

29-7/8" (75.9 cm)

Anti tip Bracket must be installed for freestanding applications. Can be removed for built in applications.

Front and Rear Leveling Legs

Drawer fully opened

45-1/8" Not including (114.6 cm) custom panel

23-3/8" Not including (59.4 cm) custom panel

1-7/8" (4.8 cm)

1-7/8"

34-1/4" to 34-1/2" (87 to 87.6 cm)

1-7/8"

1-7/8"

22"

22" (55.9 cm)

23-3/8"

23-3/8" Not including (59.4 cm) custom panel

23-3/8"

23-3/8"

34-1/2" (87.6 cm)

*24" (61 cm) standard cabinet depth

*Depth dimension may very depending on each individual installation.

Electrical Requirements: 115 volts, 3.3 amps running max. 15 amp dedicated circuit required. 3 prong grounded receptacle required.

Power outlet can be located in the back wall behind unit. Add 1" to depth for thickness of plug, or recess outlet 1" into the wall. Power outlet can also be installed in adjacent cabinetry with a cutout for routing of power cord. Follow all local building codes when installing electrical and unit.

Product weight = 195 lbs. (88.4 kg.)
FOR MODELS 60RDE and 80RDE WITH OVERLAY PANELS
INSTALLATION INSTRUCTIONS

**CAUTION**

Determine Wood Screw Requirements
1. A #8 pan head wood screw should be used to properly secure the overlay panel. A total of 8 screws per drawer for the 60 unit and 10 screws per drawer for the 80 unit will be required. (See Figure 9). Necessary screws are supplied with unit.
2. Use only pan head screws.
3. If your overlay panel is thinner than 5/8” (15.9 mm) you will need to purchase shorter screws.

Step 1: Remove Drawers from unit.
1. Remove drawer from the unit. Begin by pulling out the drawer. Locate the drawer lock which can be found on the outside of the cabinet slide (see Figure 5). Push the back of the drawer lock forward and then down, releasing the drawer from the cabinet slide (see Figure 6). Repeat this on the opposite side of the drawer. Lift the drawer up from the slides at a 90 degree angle to fully extricate the drawer from the cabinet (See Figure 7).
2. Remove the gasket from the drawer front. Do this by pulling the gasket out of the channel that holds it to the drawer front. This will expose the clearance holes for mounting the overlay panel. (See Figure 8).

---

![Figure 5](image1)
![Figure 6](image2)
![Figure 7](image3)
![Figure 8](image4)

---

![Figure 9](image5)
FULL OVERLAY PANEL INSTALLATION INSTRUCTIONS

Step 2: Size the Overlay Panel

Cut the overlay panel to the dimensions shown below. Use Figure 10 for the 60RDE Drawer, and Figure 11 for the 80RDE drawer.

Step 4: Attach the Overlay Panel to the Drawer

1. Set the overlay panel on drawer front face and align edges. (See Figure 12 below). Clamp panel in position and mark pilot hole locations. Pick the required pilot hole size from “Table A” below and drill the pilot holes ensuring not to drill all the way through the overlay panel.

<table>
<thead>
<tr>
<th>Material Type</th>
<th>#8 Wood Screw</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hardwood</td>
<td>3/32 Dia. Pilot Hole</td>
</tr>
<tr>
<td>Softwood</td>
<td>5/64 Dia. Pilot Hole</td>
</tr>
</tbody>
</table>

2. Insert wood screws through clearance holes and tighten to secure overlay panel.

3. Reinstall gasket into channel. Make sure the corners are fully inserted.

Step 5: Reinstall the Drawers

1. Fully extend drawer slides and place drawer on slides. Be sure that drawer sits evenly on both slides.

2. Lock drawers into drawer slides. Push drawer locks down and then back to relock the drawer into the slide.

Using clearance holes in gasket channel mark hole locations onto panel.
Start Your Appliance
Your refrigerated drawers have been fitted with a **Sentry System™** refrigeration monitor. It is located at the top front of the cabinet and can be accessed by opening the top drawer. Your appliance will start upon initial plug-in. On start the Sentry System™ monitor will flash amber. This is normal. Press the “ON/OFF” button and the appliance resets and the LED turns green. (Refer to Figure 13 above).

Set Your Temperature Mode
This product can display either Fahrenheit or Celsius. To do so, press the “°F/C” button on the display panel to change from one to the other.

Set the desired temperature
The available temperature range of the unit is from 33°F to 47°F (1°C to 8°C). This range allows flexibility of temperature preferences and provides the ideal storing and serving temperatures. The temperature is initially set in the factory at 37°F (3°C). The temperature set point can be lowered or raised by first pushing the “SET” button on the display pad. A “SET” icon will be displayed in the temperature display. Pressing and releasing either the “WARMER” or “COLDER” buttons located on the display pad will raise or lower the set temperature by one (1) degree at a time. As with any refrigeration product, there will be slight temperature variance at different locations within the cabinet.

Load Your Appliance
Load your appliance with your desired items. Please note that it may take up to 24 hours for your refrigerator to reach the desired temperature once loaded. This will primarily depend on the amount of contents loaded into the refrigerator and the amount of opening and closings of the drawers. Consider this when initially loading the drawers. Best results will be obtained by first allowing the drawers to “pull down” to your set temperature before loading the drawers.

Interior Light
The upper and lower interior lights make it easy to view your food and beverages. The light will always come on when either drawer is opened, except when unit is in Sabbath Mode.

Defrost Cycle
In order to maintain optimal performance, your refrigerator must periodically enter a defrost cycle to clear frost buildup. During the defrost cycles, the display will show DEF, and changes to setpoint and °F/°C setting may not be made.

Sabbath Mode
Your refrigerated drawers are equipped with a Sabbath Mode feature. By activating this mode, you will be disabling all displays, audible alarms and lights. To activate the Sabbath Mode, press and hold the “SET” button while pressing the “°F/C” button four (4) times within seven (7) seconds. To disable the Sabbath Mode, repeat the process. The Sabbath Mode will deactivate automatically after 72 hours.
USING YOUR REFRIGERATED DRAWERS

Warning Alarms
The Sentry System™ monitor will let you know if your unit is not functioning properly for the following reasons. Door ajar, high or low temperature, and power failure. These alarms are explained below.

Door Ajar Alarm
If the drawer has been left open for over five (5) minutes, the alarm will sound and the LED will flash green. This will stop as soon as the drawer is closed, or can be reset by pressing the “ON/OFF” button.

High and Low Temperature
If your unit reaches temperatures outside normal operating temperatures for your set point for more than one (1) hour, an alarm will sound and the LED will flash red. This will warn you that your contents have seen temperatures that may not be conducive for long-term storage. This alarm can be reset by pressing the “ON/OFF” button.

Power Failure
If your unit experiences a power failure, the LED will flash amber until the alarm is reset by pressing the “ON/OFF” button.

Reset Alarms
Press the “ON/OFF” button for approximately one (1) second. This will reset all audible and display alarms when the button is released.

Enable/Disable Sentry System™ Alarms
Press and hold the “SET” key for five (5) seconds to enable or disable the Sentry System™ alarms. LED will display a steady green when enabled or a steady amber when disabled.

Quick Reference Guide
The quick reference guide on page 14 and 15 can be removed from this manual and retained near the appliance for quick access to the Sentry System™ functions.
# Sentry System™ “Basic” Function “Quick” Reference

**Note:** All keypad presses are confirmed with an audible tone when released.

**CARE AND CLEANING OF YOUR REFRIGERATED DRAWERS**

**Condenser**  
The machine compartment located beneath the cabinet does not require frequent cleaning; however, satisfactory performance depends on adequate ventilation. Be sure nothing obstructs the required air flow openings in front of the cabinet. At least once or twice a year, brush or vacuum lint and dirt from the front grille openings. See Figure 1 on page 3.

**Cabinet**  
The painted cabinet can be washed with either a mild soap and water and thoroughly rinsed with clear water. NEVER use abrasive scouring cleaners.

**Interior**  
Wash interior compartment with mild soap and water. Do NOT use an abrasive cleaner, solvent, polish cleaner or undiluted detergent.

**Care of Unit**  
1. Avoid leaning on the drawer fronts, you may bend the drawer slides or tip the unit.
2. Exercise caution when sweeping, vacuuming or mopping near the front of the unit. Damage to the grille can occur.
3. Periodically clean the interior of the unit as needed.
4. Periodically check and/or clean the front grille as needed.

P/N 42245447 for 80RDE lower drawer
# TROUBLESHOOTING YOUR REFRIGERATED DRAWERS

**Before You Call for Service**

If the unit appears to be malfunctioning, read through this manual first. If the problem persists, check the troubleshooting guide below. Locate the problem in the guide and refer to the cause and its remedy before calling for service. The problem may be something very simple that can be solved without a service call. Some remedies listed in the Troubleshooting Guide are very complex. Consulting or contracting a qualified service technician may be necessary.

If Service is Required:
- If the product is within the first year warranty period please call Marvel Customer Service at 800.223.3900 for directions on how to obtain warranty coverage in your area.
- If the product is outside the first year warranty period, Marvel Customer Service can provide recommendations of service centers in your area. A listing of authorized service centers is also available at www.marvelrefrigeration.com under the service and support section.

**WARNING**

Electrocution Hazard - Never attempt to repair or perform maintenance on the unit until the main electrical power has been disconnected.

Entire Product
Limited One Year Parts and Labor Warranty
Marvel warrants that it will supply all necessary parts and labor to repair or replace in the end user’s home or office, any component which proves to be defective in material or workmanship, subject to the condition and exclusions stated below, for a period of one year from the date of purchase by the end user.

Additional Second Through Fifth Year
Limited Parts Only Warranty
During the four years following expiration of the one year limited warranty, Marvel will supply replacement parts for the hermetically sealed refrigeration system which consists of the compressor, condenser, drier, accumulator, bypass valve, connecting tubing and the evaporator that are proven to be defective due to workmanship or materials subject to the conditions and exclusions below.

The above warranties do not cover:

- Shipping costs of replacement parts or returned defective parts.
- Customer education or instructions on how to use the appliance.
- Any content loss due to product failure.
- Removal or installation of product.

Nor do the above warranties cover failure of this product or its components due to:

- Transportation or subsequent damages.
- Commercial use or use other than normal household or small office.
- Improper installation, misuse, abuse, accident or alteration, use of wiring not conforming to electrical codes, low or high voltages, failure to provide necessary maintenance, or other unreasonable use.

Parts or Service
Not Supplied or Designated by Marvel
The above warranties also do not apply if:

- The original bill of sale, deliver date, or serial number cannot be verified.
- Defective parts are not returned for inspection if so requested by Marvel.
- The refrigeration equipment is not in the possession of the original end use purchaser.

The warranties set forth herein are the only warranties extended by Northland-Marvel. Any implied warranties, including the implied warranty of merchantability, are limited to the duration of these express warranties. In no event shall Northland-Marvel be liable for any consequential or incidental damages or expenses resulting from breach of these or any other warranties, whether express or implied.

Some states do not allow the exclusion or limitation of consequential damages or a limitation on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you. This warranty gives you specific legal rights and you may have other rights that may vary from state to state.

No person, firm, or corporation is authorized to make any other warranty or assume any other obligation for Northland-Marvel. These warranties apply only to products used in any of the fifty states of the United States and the District of Columbia.

To obtain performance of this warranty, report any defects to:

Northland-Marvel
