

7000IS

PROFESSIONAL STEAM IRON STATION

The 7000IS is the largest in our line-up of professional steam iron stations. It has become the industry standard for those seeking a high quality, large size ironing station. The 7000IS establishes a new benchmark for features, ease of use, and quality of components.

The 7000IS excels at producing quality, dry, pressurized steam. Pressurized steam is the fastest and most efficient way of ironing. It allows the fibers of the fabric to be softened quicker, with the weight and heat of the iron laying the fibers down flat. This creates the crisp and clean finish demanded by professionals.
