The estimated annual energy consumption of this model was not available at the time this range was published.

Uses Most
Energy

482

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only models with 15.5 to 17.4 cubic feet and above features are used in this scale.

Freezers using more energy cost more to operate. This model's estimated yearly operating cost is:

\$34

Based on a 2001 U.S. Government national average cost of 8.29¢ per kWh for electricity. Your actual operating cost will vary depending on your local utility rates and your use of the product.
