

Element IQ™ compensates for the temperature drop when cold food is placed onto the pre-heated surface. As Sensors detect this heat drop and compensate by injecting heat for rapid recovery back to the desired cooking temperature.

The 1800 watt embedded heating design ensures maximum heat into the plates for faster cooking and reduced pre-heating time. This creates a BBQ-quality sear and sizzle.

Removable, Dishwasher-Safe Plates. The flat bottom plate is suitable for eggs and pancakes while the top plate is ribbed to sear meats. Plate positions are interchangeable and can be extended into an opened, flat 'BBQ Mode'.

Technical Specifications

Heat	1800 watts Embedded Heating Elements 320-450°F Variable control with Low, Panini and Sear Modes
Materials	Stainless steel housing Die-cast side arms Cast aluminum, non-stick plates infused with Quantanium™
Innovation	Element IQ™
Key Features	Removable, dishwasher safe plates Bottom 'Plate Release' Top 'Plate Release' Opens flat to 'BBQ Mode' Temperature dial with Low, Panini and Sear Modes Temperature responsive LCD - blue to orange Temperature conversion button 30 Minute timer dial with sound alert 1 hour Auto shut-off 6 Adjustable height settings Locking storage clip Adjustable plate tilt Integrated, removable drip tray
Size	Opens flat 260 sq. inches
Dimensions	16" x 15" x 6.5"
Weight	21.80 lbs
