It's not a chandelier,
but it does illuminate.

It's not a sculpture,
but it is a work of art.

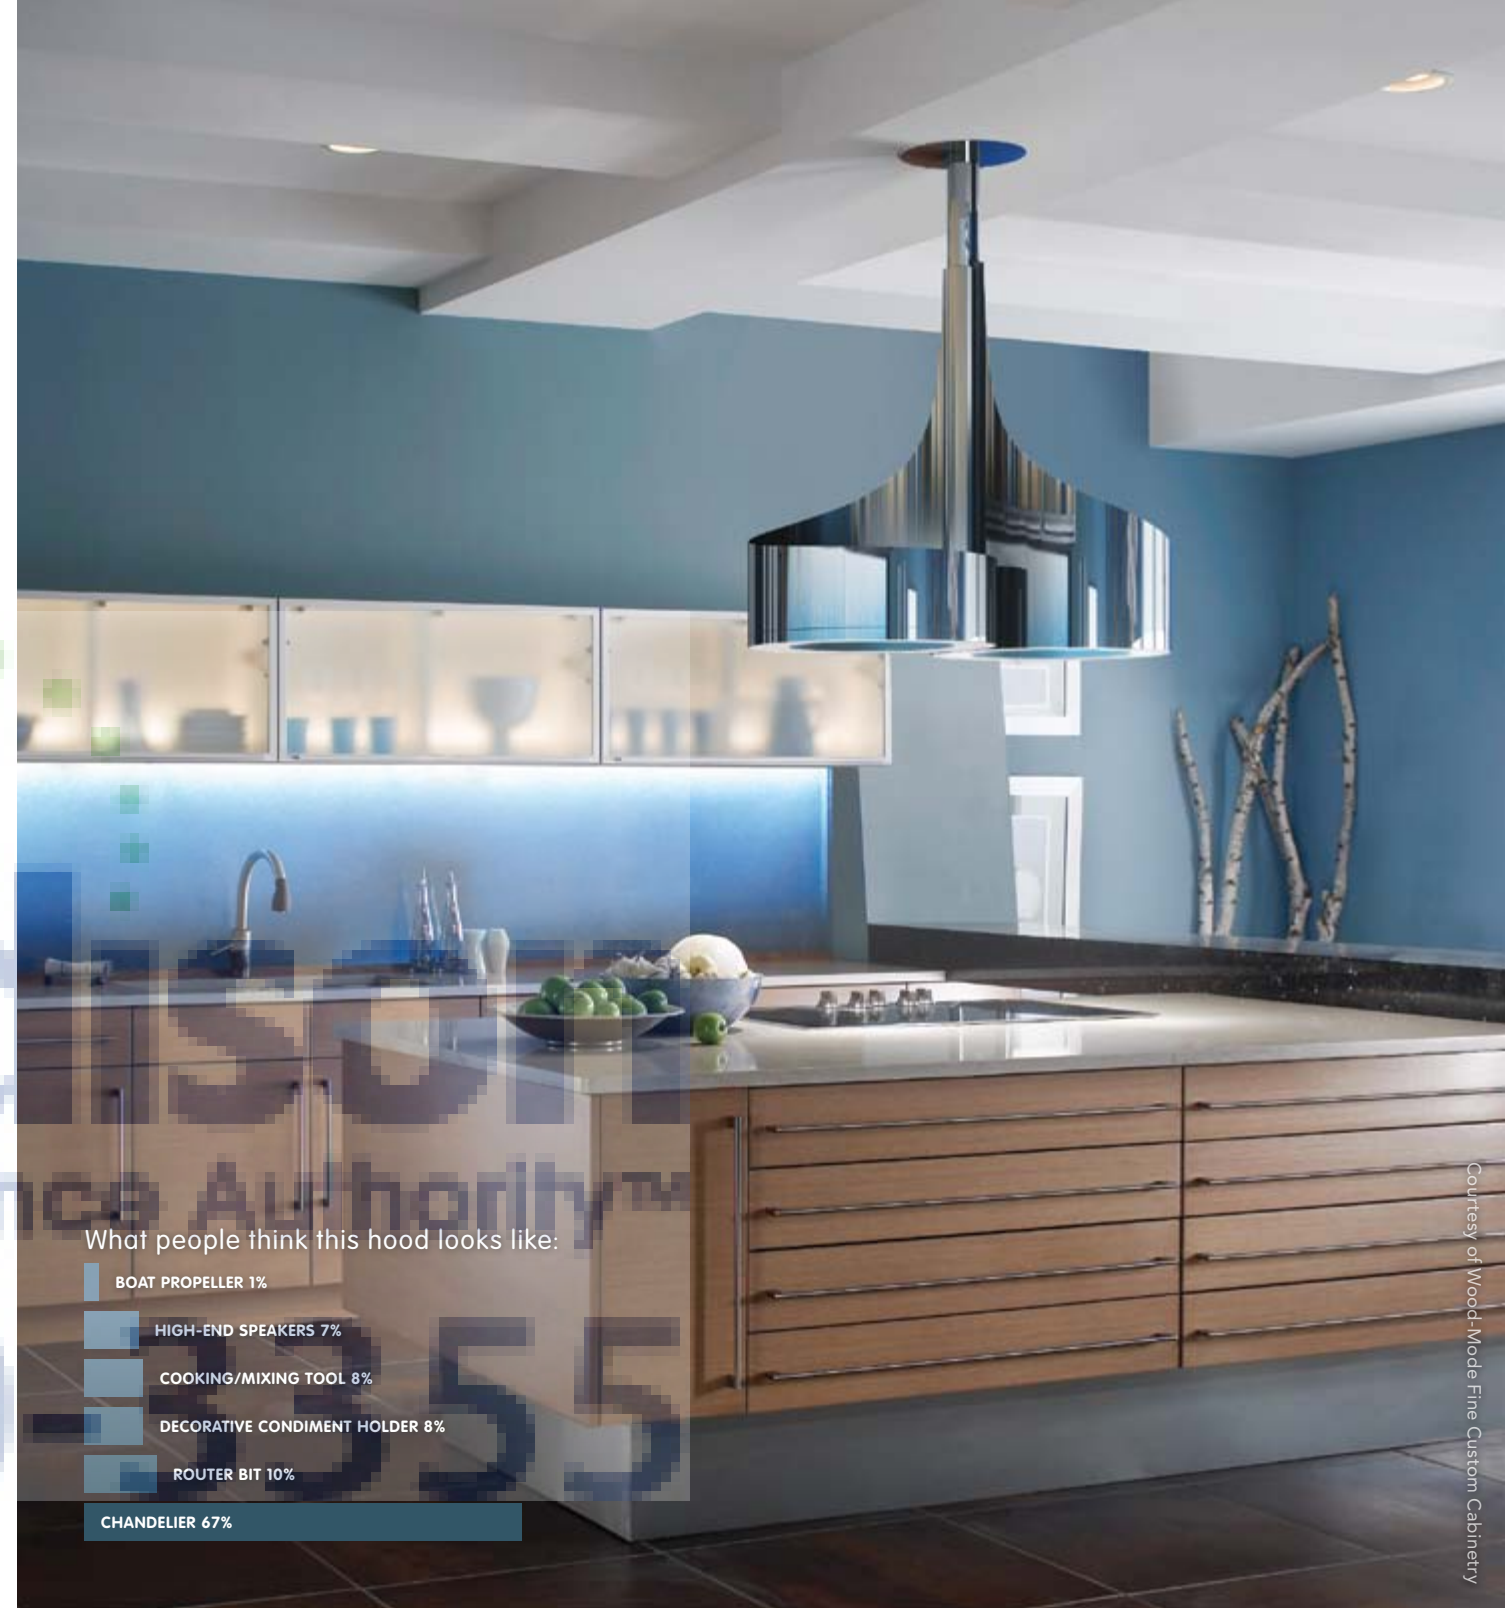

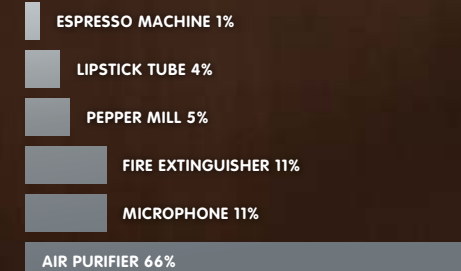

Art is personal expression. Emotion made tangible.

The Sorpresa Collection of range hoods by BEST is art made
real, functional, and beautiful, in any space it calls home.

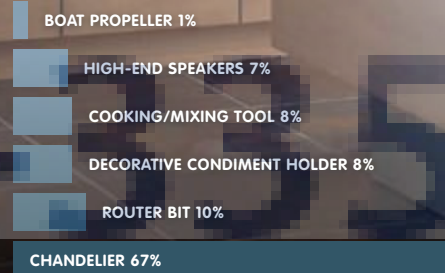

When you see it you'll agree there's no other name for it. With a graceful cylinder, and a bold wedge, **LIPSTICK** says "notice me," kisses the wall with a bold splash of color, and turns every space upside down.

What people think this hood looks like:

What people think this hood looks like:

All range hoods deal with air, but how many are sculpted by it? The elegant, polished steel of **VERTIGO DOUBLE** takes its inspiration from the vortexes of air that surround us as we breathe, ascending upward in a harmonious and fluid dance.

Is it lighting? Or is it sculpture? The answer is yes, and yes—and more. In black or white glass, it is both bold in shape and subtle in design. But no vertical duct? **SECRET** defies what a range hood has always been. It is just a little bit more.

The shape that parts the water now cuts through the ordinary. As the bow of a ship powerfully moves everything to one side or the other, the mirror-like surfaces of **GLOSS** move light and shape elegantly and uniquely from every vantage point.

Does it matter where the kitchen starts and the living room begins? Today's open-living concepts integrate rooms and vistas. **CIRRUS** does the same—linear, discrete, and virtually out of sight—gently touching the ceiling as clouds touch the sky.

Water and wind change the landscape, softening and shaping everything they caress. In nature **DUNE** finds its inspiration—a rolling hill that moves slowly and comfortably, awaiting a gentle touch.

It is a powerful visual statement from one angle, yet virtually hidden when viewed from another. With rich brushed stainless and polished black glass, **ECLISSE** embodies what art should be—an experience that continually changes as you move with it.

If you prefer the texture of the cabinetry, the color of the counter, or the way these materials work with each other, **MODULARE** is open to ideas.

Polished stainless steel timelessly frames your imagination—over and over again.

Shown with custom, cabinet-matching insert.

If you find yourself mesmerized upon first encounter, you're exactly where we'd expect you to be. **SURF** is an elegant wave caressing the shore, a single leaf riding a breeze, the page of a book waiting to be turned.
