

And Breeze™ is simple to install.

Installation can be accomplished in a few steps with readily available tools.

OPTION 1

Install thru-the-wall

The connecting line can be run through a 3" hole in an exterior wall. The wall mount unit hangs on a bracket and covers the hole.

OPTION 2

Through a window with the SimpleSill™ optional accessory

When thru-the-wall installation is not an option, the SimpleSill™ installation accessory means no large holes are drilled in your walls during installation. An expandable, plastic sill plate cover with a double locking hinge allows the revolutionary quick connect line set to be inserted through an open window.

SimpleSill™ optional accessory

Telescopes for a perfect fit in most windows. Connecting line is passed through insulated gate. Pins secure gate firmly in place. Gasketing material creates a weather tight seal.

BZSSILL2232

Fits windows 22" to 32" wide

BZSSILL3242

Fits windows 32" to 42" wide

'Snap-in' electrical connectors on unit and on connecting line

Quick-connect refrigerant lines 'click' and lock in place without tools

Condenser pad has predrilled holes to simplify placement of condensing unit

Enjoy the view! Indoor console installs high on the wall so you can have your window back.

Attractive wall mount unit is compact and lightweight. Mounts high on the wall, up and out of the way.

Breeze™

A revolution in room cooling.

So quiet you won't know it's running

Amazingly quiet wall mount unit. You won't hear the traditional operating noise made by other air conditioners.

High efficiency and variable capacity

Revolutionary auto-adjusting capacity. Inverter Technology provides more cooling when you need it and less when you don't. Save even more with these high efficiency systems by using only the amount of cooling needed.

Where does it work?

In more places than other systems. The 25' line set can run to a second floor, basement or interior room. Installs thru a small 3" hole in the wall or through a window with the SimpleSill™ accessory. And, you can take Breeze™ with you if you move.

Residential & Light Commercial Applications

- Room additions/renovations
- Homes without ductwork
- Bedrooms and family rooms
- Basements
- Sunrooms
- Computer rooms/server rooms
- Doctor/Dentist offices
- Offices in warehouses
- Buildings where security concerns prevent the use of window units
- Internal areas without exterior wall access (distance limited to 25')
- Hotels, motels and lodging
- Nursing homes and assisted living facilities

Comfort & Convenience

- Exclusive PVC wrapped line set with special quick-connectors and peel-away drain line
- Wall mount unit powered via 6' factory-wired power cord
- Inverter Technology condenser for high efficiency and auto-adjusting capacity
- 17.8 SEER rating
- LCD remote for indoor unit
- 24-hour timer and sleep timer
- Multiple operating modes including: AUTO, COOL, DRY (dehumidification), FAN ONLY and HEAT
- 4 Fan speeds heating or cooling: HIGH, MEDIUM, LOW, "QUIET", plus AUTO-FAN
- Continuous 'Air Sweep' UP & DOWN
- Auto-restart after power interruptions
- Auto-shut flaps close when unit is off for a sleeker appearance
- Washable, reusable antimicrobial air filters
- Removable front grille
- Auto-changeover from cool to heat/ heat to cool to maintain set temperature
- Low temperature operation
- Secured remote control holder
- 4 different transmitter codes to prevent unintentional interference with nearby units

Green Technology

High energy efficiency for reduced consumption of electricity and natural resources. Recyclable packaging.

The entire system is in one box:

- Indoor wall mount unit with 25' connecting line
- LCD remote control
- Outdoor unit
- Outdoor unit pad
- Hardware package
