THE HEART OF A NAPOLEON® GRILL

Heavy Duty Stainless Steel Cooking System

The even, consistent heat from high and hot to low and slow.

- Patented WAVE™ rod cooking grids for those Napoleon® trademark sear lines
- Patented self cleaning sear plates for reduced flare-ups
- Durable 16 gauge burners for controlled, even heat

Oven-like Performance

Napoleon's LIFT EASE™ roll top lid tucks neatly back giving you more space on your patio or deck. The tightly sealed lid will not be compromised by prevailing winds. Maximum heat is retained in the streamlined, double-walled lid for oven-like performance.

Versatile Burner Systems

- Rear stainless steel rotisserie burner heat waves seal and lock in the juices quickly for superior tenderness. Restaurant style results and perfect self-basting roasts every time. (Heavy duty rotisserie kit with counter balance, stainless steel rotisserie bracket and forks available with most models).
- Ceramic bottom burner with thousands of evenly spaced flame ports generate infrared radiant energy. The intense, 1800° heat of the infrared SIZZLE ZONE™ instantly locks in valuable juices, mouth-watering flavour, and tantalizing aroma, to deliver an amazing taste sensation. Go ahead, lift the lid, reach for the red knob.
- Tube burners run front to back for precise heat control, allowing for independent use of each cooking zone such as direct or indirect cooking.

Charcoal Flavour From Your Gas Grill

Napoleon's optional charcoal tray is designed to let you add the fun & flavour of charcoal anytime, on your gas grill. Simply replace a sear plate with the charcoal tray, add charcoal and light with your gas grill.

Electronic Ignition

Simple one touch electronic ignition ensures trouble free starts.

Universal Rotisserie Kit

Every Napoleon® Prestige® grill (excluding P450) comes with a complete rotisserie kit to use with your rear burner. The rotisserie kit allows you to cook larger roasts, chickens and turkeys using the restaurant style method of rotating the meat while cooking from the rear burner, self basting in it's own juices.

Temperature Gauge

The ACCU-PROBE™ temperature gauge lets you safely and instantly read the internal temperature of your grill with the lid closed. It works like your conventional oven and features a heat-resistant stainless steel probe. This thermometer has a wide temperature measurement range from 0° to 370°C (0° to 700°F) and includes the ideal smoking and searing range.

Napoleon® Limited Lifetime Warranty

A growing number of people are discovering the joys of cooking on their Napoleon® grill. We are here to ensure your love for your Napoleon® grill is a bond that continues to bring you and your family a sensational grilling experience for years to come. Your purchase includes exclusive access to our customer care hotline and President's Limited Lifetime warranty, providing you with peace of mind.

THE MOST VERSATILE COOKING STYLES AVAILABLE

Direct Cooking

This method of cooking utilizes all burners, cooking the food directly above the flame “GRILLING” style, for searing steaks, other meats or vegetables. Keeping the lid down reduces the cooking time and cooks through to the center faster than with the lid up. Anything that is less than 2 inches in thickness should be cooked by direct grilling. These are things that generally cook quickly and benefit from the fast cooking of a hot grill. Front to back burners were designed for precise heat control, allowing for independent use of each cooking zone.

Indirect Cooking

Indirect grilling is similar to baking. The food is placed above the unlit burner instead of directly over the flame. This can be achieved by only igniting some of the burners – light one side on high and cook the food on the other. The food will cook more evenly as it is not exposed to direct heat from the burners. This is an excellent way to cook tough cuts of meat, like brisket and ribs, that require long, slow cooking at a low or moderate heat. Indirect grilling allows you to work over a more moderate temperature (275° to 350°) and makes it easy to introduce a smoker pipe for extra flavour. For chicken, game, turkey, roasts, ham, vegetables, bread or combinations, the indirect cooking method gives great results every time. There is little need to turn the food. You can place the food directly on the grids or in a cooking pan.

Rotisserie Cooking

Rotisserie cooking allows the food to self-baste, sealing in the juices while browning the outside surface. Use the rotisserie method of cooking for large cuts of meat like roasts, poultry or legs of lamb. There are so many advantages to rotisserie cooking. Meats are generally juicier, self-basted and slow roasted. You can use the rotisserie method if your grill comes with a rear rotisserie burner, which requires much less attention than any other cooking method. The rotisserie burner is a nice feature because it automatically sets you up for direct, even heating.

Infrared Bottom Burner Cooking

Do you want to make the perfect steak? The intense 1800° heat instantly sears the meat, locking in the juices. Larger cuts of meat may be moved to the side of the grill to continue cooking.

Convection Style Cooking

Bread, buns, cakes and pizzas can be cooked to perfection under the grill hood. For convection cooking, follow the same instructions as for the indirect cooking method. Your grill comes with a tightly sealed lid for heat retention, giving oven-like performance.

Smoking

Place wet wood chips into the smoker tube and place over the left burner, then turn the burner on. Place your meat over the right burner, but do not turn on that burner. You are using the indirect cooking method. Smoke the meat for several hours under a closed lid. To achieve maximum flavour, fresh wood chips may be added several times during the cooking process.

Charcoal Cooking

Unique to Napoleon®! Optional charcoal trays. Gives you the freedom to switch from gas to charcoal with relative ease. With charcoal you can utilize indirect cooking as well as direct cooking.

THE ANATOMY OF THE PERFECT OUTDOOR KITCHEN

800-570-3355

INSTALLATION SPECIFICATIONS

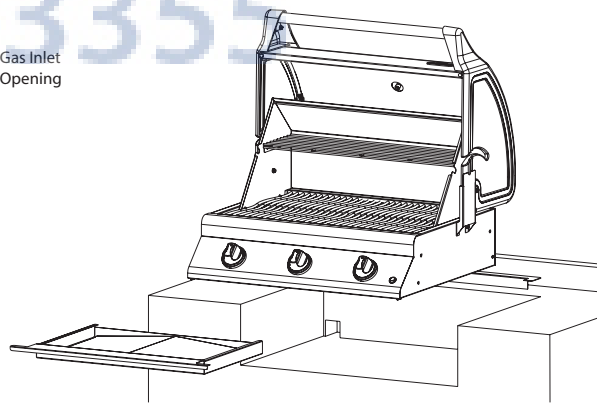

OASIS™ MODULAR ISLAND SAMPLE

Countertops must be ordered and supplied locally by the homeowner.

The countertop material must be non-combustible if a grill is to be installed into it. They can be ordered in advance by drawing out the floor plan of how the cabinets will be situated and adding up the width measurements, allowing 1-2 inches of countertop overhang. Most countertop manufacturers are willing to come and take measurements after assembly of the cabinets is complete to ensure a perfect fit. For best results the countertop thickness should be between 3/4 to 1 1/2" thick. The built-in grill head comes with stainless steel brackets and hardware that allow the unit to rest on the countertop above the corresponding island cabinet for that unit. Granite is an excellent choice of countertop materials. Decorative countertops made of ceramic tile set on top of cement tiling board can be selected to match your surrounding backyard furniture colour.

BUILT-IN SAMPLE

* Additional clearance may be required for openings. See owners manual

Please use manual to properly assemble your built-in grill. Refer to the main manual for operating, cleaning, and maintenance instructions. This grill is designed for non-combustible enclosures only (unless the Napoleon® zero clearance kit is utilized), and must be installed and serviced by a qualified installer to local codes.

BUILT-IN PROPANE GAS HOOK-UP: The piping up to the gas grill is the responsibility of the installer and piping should be located as shown in the built-in instructions. The installation must comply with CAN B149.1 Natural Gas and Propane installation code in Canada, or to the National Fuel Gas code, ANSI Z223.1 in the United States. The tank can not be stored below the gas grill. Built-in units are supplied with a drip pan which holds only a minimal amount of grease. To prevent grease fires, the pan must be cleaned after each use.

Drawings for reference only. Minimum 6" clearance required between grill and other appliance. Specifications subject to change without notice.
