

CGS990SETSS

GE Café™ 30" Free-Standing Range Gas Double Oven with Convection

Dimensions and Installation Information (in inches)

Electrical Requirements: 120v; 60Hz, 15A

Effective January 1, 1996, the National Electrical Code requires that new construction (not existing) utilize a 4-conductor connection to an electric range.

Receptacle Locations: Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Installation information: Before installing, consult installation instructions packed with product for current dimensional data.

Optional accessories: Tall backguard JXS8055 (Available at additional cost)

Recommended area for 120V outlet on rear wall and area for through-the-wall connection of pipe stub and shut-off valve.

Recommended area for through-the-floor connection of pipe stub and shut-off valve.

For answers to your Monogram®, GE Profile™ or GE® appliance questions, visit our website at geappliances.com or call GE Answer Center® service, 800.626.2000.

imagination at work

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

Specification Revised 5/11
