

All Electrical Transformers plug into the grill behind the control panel on the left side, if you are looking at the grill from the front.

All Gas Line Connection are at the rear bottom right of the grill, if you are looking at the grill from the front.

**Ventilation of Island:**

- \*Minimum of 2 vents for an island.
- \*Each vent must be at least 20 sq in.
- \*Alternate sides of the island is preferred for cross-ventilation.
- \*See Owners Manual for full details

**Clearance to Comustible Construction:**  
When choosing a location for your gas grill, you should not locate it under any combustibile construction. The side, bottom, and back of the grill should not be any closer than 24" to combustibile material.

**Cutout Dimensions:** Build your bbq island to these specifications to ensure proper fit of the product being used.  
**Overall Dimensions:** Describe the actual dimensions of the product once it is resting/installed in a bbq island.  
**Clearance to Combustibles:** The dimensions required by the manufacturer for clearance to combustibile materials.  
**Total BTU Ratings:** These numbers show the total volume of gas used by the product while operating at full capacity

**Important Note to Consumer:** This flysheet is not intended to replace your Owners' Manual which contains specific safety requirements and consumer guidelines. Please refer to your Owners' Manual prior to operating your built-in bbq. All grills listed are intended for outdoor use only and are not intended to be installed in or on recreational vehicles or boats.
