

Description: The CAS-D Dual Outlet Air Switch is an easily installed air actuated On/Off control for any electrical device up to 12AMP at 120V Max. Simply plug the dual outlet box into any standard electrical outlet and plug the appliance into either of the receptacles provided in the dual outlet box. Pressing the air button, mounted up to 15 feet away, will alternately activate or deactivate two appliances.

Typical Installation:

Installation Instructions:

1. If no extra hole exists, drill a hole of 1 3/8" to 1 1/2" into the sink or countertop where the Actuator Button is to be placed.
2. Fit, from the top, the Actuator Outlet through the drilled hole.
3. Thread the Actuator Nut onto the Actuator Outlet and tighten finny by hand.
4. Firmly connect Air Tube: one side to the Actuator Outlet and one side to the Sensor Inlet

Plug In Disposer Application:

- Eliminates need for an electrical wall switch.
- Simplifies first time garbage disposer installation.
- Operates on 120V household wall receptical

**SAFETY INSTRUCTIONS:**

1. **DANGER:** To reduce the risk of injury, do not permit children to use this product unless they are closely supervised at all times.
2. Install CAS-D Safety Switch with Air Tube connector facing downward to provide drainage of electrical component compartment.
