

The ultimate cooktop should be fast, simple to use, and the complete opposite of boring.

European Style in Glass or Stainless Steel

Siemens avantGarde® gas cooktops are available in two styles, each of which complements contemporary kitchens beautifully. The ceramic glass model features singular sophistication and elegance, while stainless steel models feature clean, upswept designs. Small wonder Siemens is Europe's number one brand of built-in appliances.

Professional Cooking Performance

The ceramic glass model features intelligent burner spacing to fit all pots on all burners at once, front controls that maximize cooking width and a powerful wok burner. Stainless steel models feature continuous grates, intelligent burner spacing, front controls and a powerful xForce™ three-flame burner. Every detail is designed for optimum performance.

30" or 36" Models

With stainless steel cooktops available in 30" or 36" sizes, and the glass cooktop available in a 36" size, kitchens of any size can feature a professional avantGarde™ gas cooktop.

Easy Cleaning

One-piece glass and stainless steel designs and sealed burners make cleanup simple.

German Engineering

No detail is overlooked in the construction of a Siemens avantGarde® cooktop. The components are engineered for durable and long-lasting performance.

avantGarde® Gas Cooktops

The future moving in.
