Side-by-side

... without partition

If the appliances are installed directly next to each other (without a partition), they need to be attached together. A heating mat must also be installed. This will help avoid condensation and prevent damages.

... with partition

The minimum thickness of the partition is $\frac{5}{8}$ " (16 mm).

If there is a partition with a thickness **from $\frac{5}{8}$ " (16 mm) to $6\frac{5}{16}$ " (160 mm)** between the adjacent appliances, then each appliance should be individually installed within its own niche using the mounting accessories included.

In this case, you will only need the heating mat from the "Merging Kit" to avoid condensation and prevent damages.
