

Sharp's new Plasmacluster™ Air Purifiers with humidifying function offer a unique combination of air treatment technologies to make you and your family more comfortable, whatever the season. Bacteria, germs, mold spores, pollen, pet dander, smoke, dust and odors can make breathing harder, especially for asthma and allergy sufferers. These air purifiers help remove these irritants from the air that passes through it with an ultra quiet fan that draws air through a three-stage filter system. Plus, their revolutionary Plasmacluster Ion Technology actively refreshes the air. For an even more comfortable environment, when the Plasmacluster™ Air Purifier is on, its sensors constantly monitor the air quality in your room, adjusting the fan for air purity while providing the optimum humidity level. This combination of features is a smart way to choose cleaner, healthier, more breathable air.

Features:

New Humidification Function adds humidity to the air for more comfortable air quality, especially in colder weather. It also helps reduce static electricity that results from dry air.

True HEPA Filter captures 99.97% of particles as small as 0.3 microns from the air that passes through it, including pollen, mold, pet dander and dust.

Plasmacluster™ Technology splits water molecules into positively and negatively charged ions which spread throughout the room. This system effectively refreshes the air similar to the way nature cleans the environment near waterfalls or just after a thunderstorm.

Clean Sign Indicator shows the level of impurities in the air passing through the filter so it's easy to see the progress as healthier, cleaner air is returned into the room.

Manual Operation lets the user choose among 3 fan speeds and the Quick Clean mode.

Automatic Operation uses sensors to automatically adjust fan speed for the degree of cleaning and/or humidification required.

Library Quiet™ operation is ideal for bedrooms and living rooms. Silent Mode is as quiet as 25 decibels, about the volume of rustling leaves. The KC-830U is among the quietest Air Purifiers with a true HEPA filter available anywhere.

Energy Efficient operation means it's easy on the wallet. With its advanced technologies, it is 35% more energy-efficient than standard models, making it ENERGY STAR® qualified. So it can operate all the time, saving money while improving the quality of the air.

Ultra Long Life HEPA Filters require changing only once every two years* so operating costs are low.

Stylish Design looks great in any home or office.

* Depending on use and room conditions

Features & Specifications

Model Number	KC-830U
Air Purification System	Plasmacluster™ and Fan
Plasmacluster™ Ion Mode	On / Off
Plasmacluster™ Indicator Light	Yes
Micron Mesh Pre-Filter	Yes
Deodorizing Filter	Yes (Replaceable, lasts up to 2 years)
True HEPA Filter*¹	Yes (Replaceable, lasts up to 2 years)
Humidification Filter	Yes (Replaceable, lasts up to 1 year)
Indicator for Time To Clean Filter	Yes
Humidification System	Natural Vaporization
Tank Capacity	4.4 pints
Sensor / Display	Yes; Display monitors air quality levels
Clean Sign Indicator	Yes
Lights ON/OFF Button	Yes
Manual Operation	Yes; Humidity On / Off
Fan Speeds	3 (Max / Med / Low) and Auto with Sensor
Voltage / Frequency	120V / 60Hz
Recommended Room Size	124 sq. ft. (approx. 10' x 12')
CADR (Clean Air Delivery Rate) (cubic feet of air cleaned per minute)	Dust 92 / Smoke 80 / Pollen 130
Noise Levels: Max / Med / Low (dB)	48 / 40 / 25
Unit Dimensions (w x h x d) (in inches)	14-3/4 x 21-1/8 x 8-1/8
Unit Weight (in pounds)	13.9
Limited Warranty*²	1 year parts and labor
Safety Standard	UL / cUL Listed
ENERGY STAR® Qualified*³	Yes
UPC	074000662964

*¹ High Efficiency Particulate Air Filter
