CUSTOM PANEL INSTALLATIONS

These units do not come equipped with a front panel. They are designed to accept a custom door panel supplied by the cabinet maker. Miele has a unique panel integration system which allows the panels to align with the surrounding cabinets.

Panel size is determined in the following manner:

Width: 35 3/4" in all cases

Thickness: Minumum 3/4" outside frame

Standard Upper Panel Height: 53 5/16"

Notes: Finish back side of panels to insure appearance

Panel may extend above unit. This is **not**

considered in height calculation

Upper Maximum panel weight: 83.8 Pounds

Lower Panel Height: Use the following calculation:

Panel Height = HOM - 53 9/16 - TKH

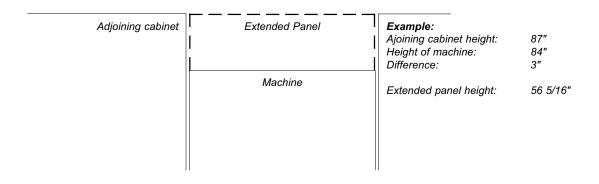

HOM = Total height of machine. Can be adjusted to match adjoining cabinets - **typically 84"**HOM is adjustable between 83 1/2" - 85 3/8"

TKH = Toe-kick height (2" - 8 3/8")

Lower Maximum panel weight: 31 Pounds

Upper Panel Notes

If the adjoining cabinets are taller than the height of machine (HOM) - the upper panel may be extended accordingly. Find the difference between height of the adjoining cabinets and the height of machine (HOM) and add to 53 5/16"
