

#### multiMedia Hood

It's much easier to follow a cooking show when the show is right above your cooktop. Siemens has integrated a high-resolution 17" LCD into a 36" chimney hood. It's controlled by remote, so it's easy to TiVo and pause programs. For added versatility, it also plays DVDs and audio CDs. For use only with electric or induction cooktops, the Siemens multiMedia hood offers 600 cfm of power, and at just 54 dB at maximum power, is extremely quiet.

#### Chimney Hood

This powerful vent hood combines a three-speed 400 cfm fan with a sleek, sophisticated design. Designed for use above any gas, electric or induction cooktop, it offers electronic controls, an easy-to-clean glass front and dishwasher-safe filters. Available to fit 30" and 36" cooktops.

#### Under Cabinet Hood

This low-profile hood is perfect for kitchens where space is at a premium. Available in 30" and 36" sizes, it features a recirculation option, 280 cfm fan, halogen lighting and an easy-to-clean design.

#### German Engineering

Siemens is the number one brand of built-in appliances in Europe. No detail is overlooked in the construction of a Siemens appliance. Each is designed to provide sophisticated style and long-lasting durability.

Who would have thought there could be so many sophisticated ways to inhale smoke?
