

# PELLET 101

Louisiana Grills offers premium hardwood pellet blends for an elevated outdoor cooking experience. Our pellets are made from 100% all-natural hardwood of the highest quality food grade material to provide a next level fuel source for pellet grills and smokers.

Louisiana Grills hardwood pellets never contain artificial flavors, spray scents, glues, or chemicals for a hotter and cleaner burn – every time. Each of our pellet blends upgrade every meal with bold, natural flavor, ranging from sweet and fruity to rich and savory.

## How they're made

Louisiana Grills hardwood pellets are made from 100% all-natural repurposed hardwood at locations across the U.S. and Canada. The saw dust is pressurized at extreme heat to create compact pellets that are held together with the wood's natural lignin.

## Benefits of Louisiana Grills Pellets

- They produce less than 1% of ash, so an entire 40 lb bag of pellets will only turn into a half cup of ash for easier cleanup
- All-natural wood-fired, smoky flavor
- Hotter and cleaner burn
- Eliminates the need to babysit the air to fuel ratio, like with wood chips or chunks
