Fisher&Paykel

A HISTORY OF INNOVATION

Since our founding in 1934, we have grown into a global, design-led company of more than 3,000 people. Designed and engineered in New Zealand, our products are sold in 50 countries around the world. Our design heritage is founded on a pioneering spirit and a culture of curiosity that has challenged conventional appliance design to consistently deliver products tailored to human needs. For us, legacy is about looking into the future, while ensuring what we develop today is aligned to the fundamental principles of sustainable design. We are committed to ongoing research and development. Our culture is one of open innovation, which allows people to work collaboratively to find insights and ideas that connect with our customers and respect our planet.

We live one day at a time.

Cooking
eating
cleaning
washing
drying
hunting
gathering
talking
playing
relaxing.

And then doing it all over again.
Day in, day out.

TURNING ROUTINES INTO EXPERIENCES

Behind every product is a story and that story starts with you. Your home is an expression of who you are and how you live. Our passion is creating better products that turn everyday routines into enjoyable experiences. We understand the dynamic nature of modern living. We deliver products that are adaptable, functional and durable as well as human. We don't make things that fit the space provided, we create products that fit the lives lived around them. Live life — we'll take care of the details.

DESIGN FOR REAL LIFE

At Fisher & Paykel, we are curious about people—how they live, where they live, what they do and how they use things. This is where hidden insights wait to be uncovered. We are curious about not only the function and performance of our products, but also the emotional role they play in people's lives. For us, design is not a self-serving goal—it is a human endeavour to make life a little bit better.

THE SOCIAL KITCHEN

The kitchen is the humble engine room in which we choose to live—where we create, socialize and enjoy the best life has to offer. Cooking is a social activity. We generally place the key appliances in what we consider to be logical places: the work triangle of cooktop, sink and refrigerator. But we no longer cook in straight lines. We don't cook on conveyor belts. Sometimes we assemble, sometimes we bake, sometimes we stir-fry and sometimes we boil. The work triangle limits our creativity. It's not just about efficiency; sometimes it's about fun. Too many cooks may spoil the broth or they may create a wonderful social and enjoyable meal. Let's reclaim the kitchen. Let's live outside the triangle.

BUILT-IN OVENS

Fisher & Paykel's Built-in Ovens are designed with the full range of cooking modes and temperatures, providing greater control and more flexibility. Each is designed to meet the needs of the most demanding cook, as well as provide core safety features including doors with multiple panes of glass and cooling systems that ensure the external surfaces remain cool to the touch. Roasting is an art as well as a science. The difference between rare and medium takes timing, intuition and a well-trained eye. Fisher & Paykel Built-in Ovens are programed to quickly heat to a high temperature, before automatically lowering the temperature to deliver the perfect roast every time.

30″ Built-in Double Oven

Fisher & Paykel large capacity ovens are visually impressive at 30″ wide, they deliver outstanding performance and have innovative features that make it easy to cook for a crowd, be it family or friends.

1. **Innovative**

   The latest in microprocessor control means you can count on this oven to reach the specified temperature quickly, and maintain it.

2. **Convenient**

   The 10 cooking modes in both cavities can confidently cook any recipe or dish, with a special roast mode to sear the outside meat then slowly cook to the middle.

3. **Ergonomic**

   Sliding telescopic oven shelves slide in and out effortlessly, while eight shelf positions give you a vast range of options for organizing the interior of the oven.

4. **Intuitive**

   Illuminated halos surround the temperature and function dials giving great visual feedback.

5. **Responsive**

   Heats to 350°F in less than ten minutes, and to 425°F in fifteen. The powerful 4400W broil locks in flavor and nutrients fast.

6. **Precise**

   The AeroTech™ convection system guarantees consistent temperature throughout the oven.

7. **Efficient**

   At 4 cu. ft. this oven is big enough to cook a turkey on one shelf with room for a large pan of roast vegetables on another.

8. **Safe**

   Features cool touch doors that are made of four panes of glazed glass and its own cooling system to ensure externally it is safe to touch.

24″ Built-in Single Oven

The Fisher & Paykel 24″ Oven is designed with simply perfect cooking in mind. It is our latest European sized Built-in Oven, perfect where space is limited in apartments and condos. Its multi-function capability allows you a choice of roasting, warming, broiling or simply baking.

1. **Innovative**

   Choose one of six cooking modes to confidently cook any recipe or dish and use the self-clean function to do the cleaning up for you.

2. **Convenient**

   Simply remove the racking, set to the self-clean function and the oven will take care of any grease or grime, reducing it to ash that's easily wiped away with a cloth.

3. **Efficient**

   A powerful 3000W broil gives you an even and fast result, locking in all the flavors and nutrients.

4. **Intuitive**

   Each function is preset to the temperature you are likely to use, however these can be adjusted if desired.

5. **Precise**

   An electronic thermostat controls temperature variation when cooking, ensuring consistent temperatures.

6. **Safe**

   This oven features a cool-touch door with five panes of glass and a built-in cooling system to ensure it is safe to touch externally.

19:30

COOKTOPS

We cook to create. It's an art as well as a science and as much about feel as it is about control. Fisher & Paykel's cooktop family is designed to deliver choice and control. Whether your preference is gas, induction or electric, there is a full range of configurations and sizes to suit any cooking style. Each product has been designed to deliver complete control — high heat, low heat and easy cleanability.

CookSurface Cooktops

A revolution in cooking. Combining the superior performance of gas cooking and the convenience of a ceramic glass surface with retractable burners and pan supports.

1 **Easy Clean**

Sheer ceramic glass surface allows for easy cleaning after cooking—simply wipe and walk away.

2 **Space Saver**

Frameless gas cooktop with electronic control. World first—independently operated gas Aero™ burners and pan supports that retract virtually flush into the ceramic glass surface when not in use.

3 **Ergonomic**

Easily accessible and ergonomically designed three-in-a-row configuration.

4 **Intuitive**

Dial control with audio and visual feedback for precise linear flame control.

5 **Responsive**

Quiet glow ignition means quick flame with no spark and no struggling to ignite.

6 **Precision**

Uniquely designed burners ensure even heat distribution with a high setting and low turndown.

7 **Efficient**

Aero™ burners mix fan-forced air at lower settings to reduce peak temperatures for effective simmering.

8 **Safety**

Features a key lock as a safety precaution.

Gas on Steel Cooktops

With five burners, including simmer, rapid and up to a 20,000BTU wok burner, the gas on steel cooktop provides great cooking flexibility. Coupling the attractiveness of sleek stainless steel with the durability of cast iron trivets; the Gas on Steel supports the most avid chef.

1 **Innovative**

Our unique Innovalve™ technology allows you to adjust the flame with unprecedented 180 degree gas valve rotation. Most cooktops offer only 70 degree rotation (CG365DWACX1 only).

2 **Convenient**

Gas on Steel cooktops feature a wide range of burner sizes and power for everything from a slow simmer to an intense heat for steaks and stir-fries.

3 **Responsive**

Indicator lights show which burners are in use and alert you if the gas shuts down (CG365DWACX1 only).

4 **Efficient**

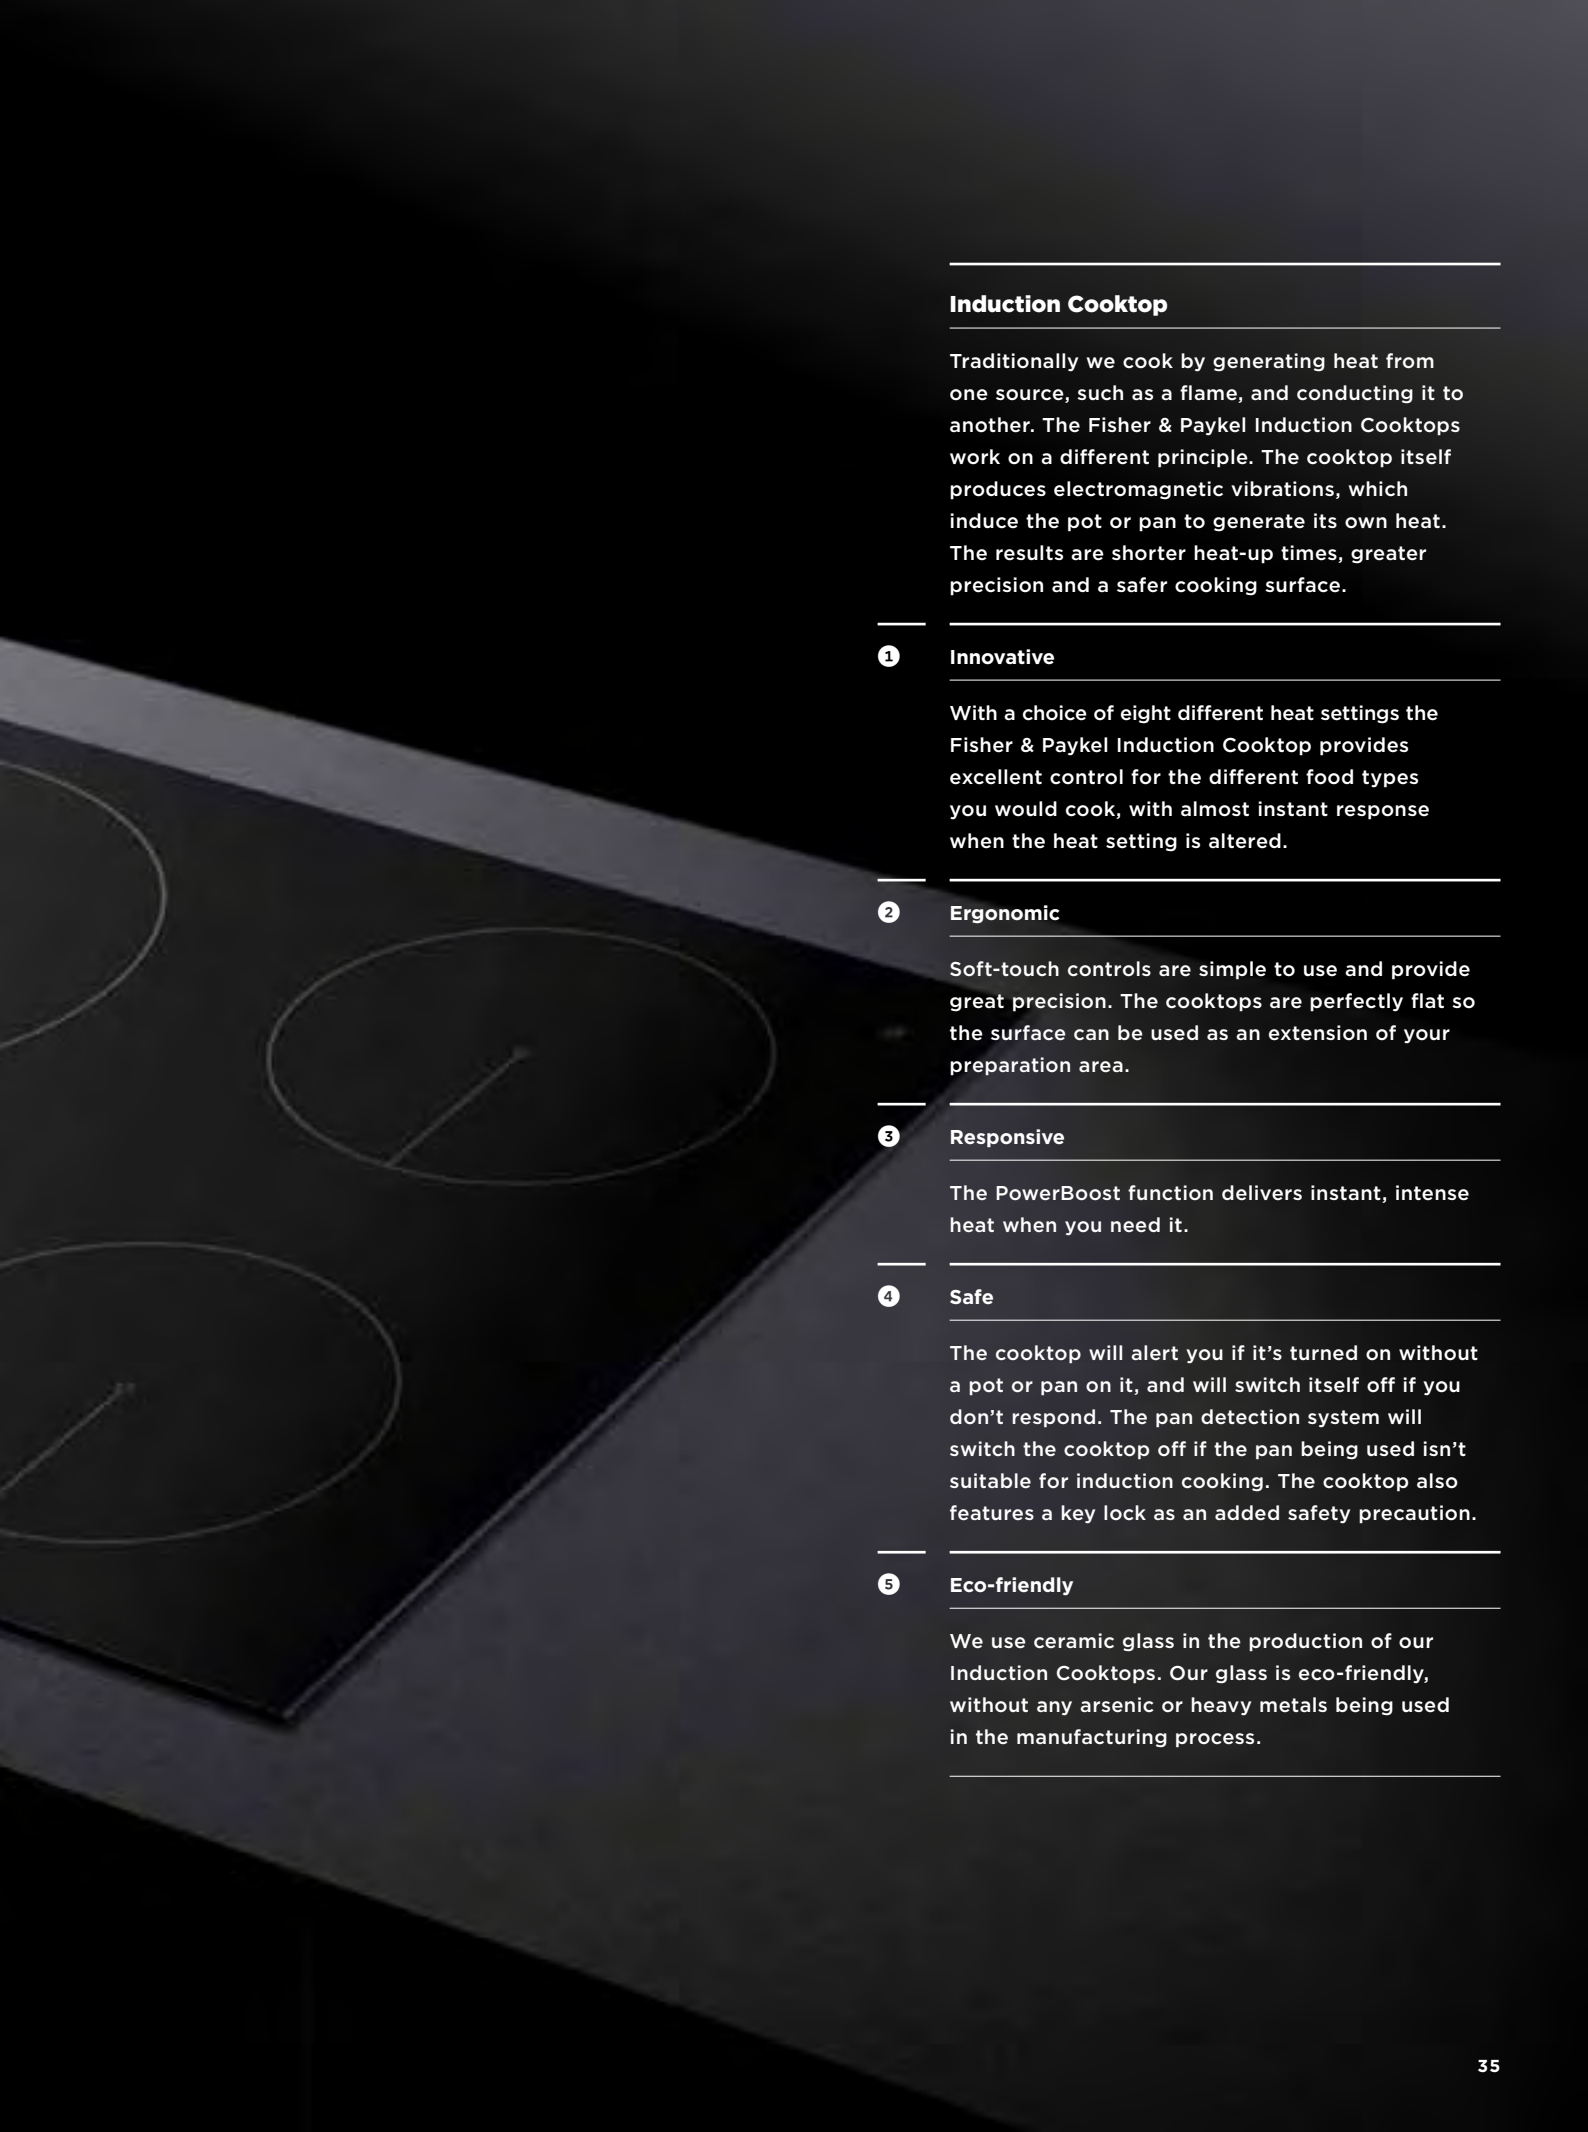
Durable, heavy-duty, continuous cast iron trivets are hard wearing for a long life.

5 **Safe**

For added safety, it features an automatic flame failure detector which cuts off the gas supply if the burner flame goes out.

6 **Reliable**

All Fisher & Paykel gas cooktops feature electronic ignition. They are quick, reliable and safe.



Induction Cooktop

Traditionally we cook by generating heat from one source, such as a flame, and conducting it to another. The Fisher & Paykel Induction Cooktops work on a different principle. The cooktop itself produces electromagnetic vibrations, which induce the pot or pan to generate its own heat. The results are shorter heat-up times, greater precision and a safer cooking surface.

1 **Innovative**

With a choice of eight different heat settings the Fisher & Paykel Induction Cooktop provides excellent control for the different food types you would cook, with almost instant response when the heat setting is altered.

2 **Ergonomic**

Soft-touch controls are simple to use and provide great precision. The cooktops are perfectly flat so the surface can be used as an extension of your preparation area.

3 **Responsive**

The PowerBoost function delivers instant, intense heat when you need it.

4 **Safe**

The cooktop will alert you if it's turned on without a pot or pan on it, and will switch itself off if you don't respond. The pan detection system will switch the cooktop off if the pan being used isn't suitable for induction cooking. The cooktop also features a key lock as an added safety precaution.

5 **Eco-friendly**

We use ceramic glass in the production of our Induction Cooktops. Our glass is eco-friendly, without any arsenic or heavy metals being used in the manufacturing process.

Electric Cooktop

Our Electric Cooktop has a number of built-in features that make cooking easier while giving you greater control.

1. **Innovative**

   Five element sizes provide cooking flexibility, including SuperSimmer which offers you extremely low temperatures ideal for melting chocolate and delicate sauces.

2. **Convenient**

   Flat ceramic surfaces allow for easy cleaning.

3. **Ergonomic**

   The ceramic surface is perfectly flat so it can be used as an extension of your preparation area.

4. **Intuitive**

   Easy-to-use and read, cylindrical dial controls, with two of the five elements offering dual sizes give you a choice of up to seven different cooking zones.

5. **Responsive**

   This cooktop has exceptionally fast heating elements which provide precise temperature control from a rapid boil to an extremely low simmer.

6. **Safe**

   After use, hot surface indicators glow until the surface is safe to touch.

7. **Eco-friendly**

   We use ceramic glass in the production of our electric cooktops. Our glass is ecofriendly, without any arsenic or heavy metals being used in the manufacturing process.

RANGES

On the outside, style is a matter of taste. So we put a little chef on the inside that can't wait to impress. Fisher & Paykel Ranges are visually impressive and give you the flexibility to prepare several courses simultaneously. With extra-large ovens, combined with four or five-burner gas cooktops and finessed with clean lines in glass and stainless steel these ranges cookers will compliment any modern kitchen.

36″ Range

Fisher & Paykel's 36″ Gas Range has an extra large oven and five burner gas cooktop allowing the flexibility to cook several dishes at once. Styled with clean lines in glass and stainless steel, it will enhance the design of any kitchen.

1. **Innovative**

   Professional performance, offering a choice of four cooking modes from Bake, Broil, Convection Bake, Defrost—perfect for any culinary requirements.

2. **Convenient**

   The door and its inner pane of glass can be removed for easy, hassle-free cleaning and the storage drawer minimizes clutter for all oven accessories.

3. **Ergonomic**

   Continuous trivets let you slide pots and pans without lifting them.

4. **Precise**

   Clear, easy-to-use dials give you exceptional control over cooking temperatures.

5. **Efficient**

   A powerful broil gives you a fast and even result, locking in all the flavors and nutrients.

24″ Range

Fisher & Paykel 24″ Ranges give you the flexibility to prepare several courses simultaneously. Available in Dual Fuel and Gas options. With clean lines in glass and stainless steel it will complement the style and elegance of any kitchen.

1. **Innovative**

   Professional performance, offering up to six cooking modes from Fan Broil to traditional Bake (selected models only) — perfect for any culinary requirements.

2. **Convenient**

   The door and its inner pane of glass can be removed for easy, hassle-free cleaning and the storage drawer minimizes clutter for all oven accessories.

3. **Ergonomic**

   Continuous trivets let you slide pots and pans without lifting them.

4. **Precise**

   Clear, easy-to-use dials give you exceptional control over cooking temperatures.

5. **Efficient**

   A powerful broil gives you a fast and even result, locking in all the flavors and nutrients.

VENTILATION HOODS

Kitchen inspiration doesn't exist in a vacuum but simple and responsive extraction is always important. Built to perform, Fisher & Paykel's Ventilation Hoods effectively capture and eliminate cooking odors, vapor and steam. Each has been designed as the perfect partner product to our cooktops and features sleek glass with brushed stainless steel.

Fisher&Paykel

Ventilation Hoods

Fisher & Paykel Ventilation Hoods offer a selection of fan speeds and clever features that quietly and efficiently remove steam, smoke and lingering smells.

1 Convenient

An interior, wipeable plate makes cleaning easier. Multi-layered filters trap grease effectively. Designed for easy removal, the filters are effortless to clean and are dishwasher safe.

2 Responsive

The sleek touch control panel responds to the touch of your finger. Halogen lights provide superb illumination over the entire cooking surface. (HC36DTXB1)

3 Efficient

Odors can linger in the kitchen well after cooking is finished. The practical timer feature keeps the Ventilation Hood working for up to 15 minutes before it automatically turns itself off. (HC36DTXB1)

WE CONTROL THE WEATHER

At the heart of Fisher & Paykel's Refrigerators is the ability to sense and respond to daily use in an intelligent way. The combination of temperature sensors with smart electronics and variable-speed fans creates a controlled environment and optimum temperature for better food care. We call it ActiveSmart™ Technology. Your refrigerator door is the most used door in your home and, every time it is opened, the temperature changes around your food. The challenge is maintaining a consistent and controlled environment despite ongoing changes inside and outside the refrigerator. ActiveSmart™ achieves this through constantly monitoring how you and your family use your refrigerator, adjusting airflow to maintain a stable and even temperature. So despite highs, lows and occasional gusty winds, when it comes to your refrigerator, let ActiveSmart™ control the weather to deliver better food care.

ACTIVESMART™
TECHNOLOGY

CoolDrawer™

The CoolDrawer™ has been designed to change from a refrigerator to freezer at the touch of a button. It is built on the concept of distributed refrigeration, combining ActiveSmart™ Technology with a drawer-based design that can be placed anywhere in the kitchen, home or entertainment area. The CoolDrawer™ provides five temperature settings to deliver total flexibility—freezer, chill, fridge, pantry and wine modes, merging intelligence with convenience.

❶ **Innovative**

The multi-temperature CoolDrawer™ is a world-first in refrigeration technology.

❷ **Convenient**

Five temperature settings can be tailored to the needs of your food: freezer, chill, fridge, pantry and wine mode, combining intelligence with convenience.

❸ **Ergonomic**

There is easy access at waist height, with smooth-running drawers.

❹ **Intuitive**

The easy-to-use electronic interface can change the CoolDrawer™ temperature at the touch of a button.

❺ **Flexible**

This innovation complements your existing refrigeration and enhances your kitchen design to suit your lifestyle.

❻ **Precise**

Highly engineered finishing ensures a ⅛″ clearance between front panels, as demanded by professional cabinetmakers.

CoolDrawer™ Features

❶ Freezer Mode

This mode is ideal for general frozen food storage with the added flexibility of three freezer functions—bottle chill, fast freeze and deep freeze. Freezer Mode is set at -0°F for longer-term storage of frozen items.

❷ Chill Mode

Chill Mode sets the compartment to a temperature perfect for highly perishable meats, poultry and seafood. For these types of food it is ideal to store them at a temperature as close to freezing as possible to retain their vital freshness. Chill Mode sets the compartment at 31°F, just above the freezing temperature for meat.

❸ Fridge Mode

This mode provides the ideal storage for most foods requiring normal refrigeration, such as fruit and vegetables, dairy products, processed meats and drinks. The compact upper storage tray is a perfect place for sensitive foods such as peaches, cherries, cheeses and deli items; the tall bin is ideal for large bottles and containers.

❹ **Pantry Mode**

This is designed for foods that require a cool, dark place for storage, such as tropical fruits, tomatoes, bananas, bread and cereals. Pantry Mode provides a solution for all those foods that you didn't previously know what to do with and have always resorted to storing on the counter top or in the cupboard. This setting offers a stable storage environment at 54°F, making it ideal for sensitive foods.

❺ **Wine Mode**

Using the innovative Wine Mode, connoisseurs can take advantage of special settings that preserve and present wine at its optimum temperature. This mode is ideal for long-term storage of all wine at 54°F and offers two temperature selections for short-term storage.

Counter Depth French Door

Our French Door refrigerators have been designed to maximize space as well as access. They bring theatre into the kitchen with wide-open shelf spaces and unobstructed access to wide shelves. Below, a spacious full-extension drawer and storage bins provide ergonomic solutions for freezer items.

❶ Ice & Water

Ice & Water models deliver chilled, filtered water automatically. The slimline water touch pad and angled water delivery mean that just about any size or shape of pitcher can be filled. The icemaker automatically delivers ice into a dedicated bin and can be easily customized to store different volumes.

❷ Humidity Control System

Fruit and vegetable quality can be maintained at the right humidity and temperature level. The Humidity Control System, together with the cool and consistent temperature delivered by ActiveSmart™ Technology, creates the perfect microclimate in each produce bin.

❸ Ergonomic

Uninterrupted wide-open spaces and numerous shelving options enable easy customization for different uses. Quality extension runners allow you to slide out storage bins and trays fully for easy loading and unloading. The storage bins are removable, making food preparation and cleaning easier.

❹ Efficient

Alarms on the refrigerator and freezer alert you if the door has been left open. Adaptive defrost means that there is no need for ‘vacation mode’ settings. The microprocessor will select the best time to defrost based on how the appliance is being used. When you are away, it will recognize lower levels of use and defrost less often, therefore requiring less energy.

❺ Safe

Secure glass shelving contains drips and spills and prevents them from falling on items stored below.

Bottom Freezer Refrigerators

These refrigerators have been designed for what you use most often. The refrigerator compartment enables easy access to everyday items. It includes ergonomic glass shelves and storage bins that can be configured to suit every lifestyle. The lower drawer-based freezer ensures that long-term storage items are just as easy to access.

❶ **Ice & Water**

Ice & Water models deliver chilled, filtered water automatically. The slimline water touch pad and angled water delivery mean that just about any size or shape of pitcher can be filled. The icemaker automatically delivers ice into a dedicated bin and can be easily customized to store different volumes.

❷ **Humidity Control System**

Fruit and vegetable quality can be maintained at the right humidity and temperature level. The Humidity Control System, together with the cool and consistent temperature delivered by ActiveSmart™ Technology, creates the perfect microclimate in each produce bin.

❸ **Ergonomic**

Uninterrupted wide-open spaces and numerous shelving options enable easy customization for different uses. Quality extension runners allow you to slide out storage bins and trays fully for easy loading and unloading. The storage bins are removable, making food preparation and cleaning easier.

❹ **Efficient**

Alarms on the refrigerator and freezer alert you if the door has been left open. Adaptive defrost means that there is no need for 'vacation mode' settings. The microprocessor will select the best time to defrost based on how the appliance is being used. When you are away, it will recognize lower levels of use and defrost less often, therefore requiring less energy.

❺ **Safe**

Secure glass shelving contains drips and spills and prevents them from falling on items stored below.

SURROUND KIT

The refrigeration Surround Kit for our RF170, RF135 and E522B flat door models helps create a seamless connection between your appliance and its surrounding cabinetry. Available in a stainless-steel finish, the kit frames and complements the product. A Joiner Kit can also be used to join two refrigerators. For more information, visit fisherpaykel.com.

ActiveSmart™ Features

❶ Humidity Control System

The Humidity Control System, together with the cool and consistent temperature delivered by ActiveSmart™ Technology, creates the perfect microclimate in each produce bin. The humidity control lid protects fresh produce from drier refrigerator air, keeping fruit and vegetables fresher for longer. The lid traps the excess water vapor produced and channels it away for evaporation. Two humidity control slides offer settings for both fruit and vegetables, ensuring optimal moisture and freshness is retained.

❷ Variable-speed Fans

Independent variable-speed fans control airflow through multiple air ducts in the refrigerator and freezer. This means greater control when new items are introduced to either compartment as well as rapid chill and freezing to ensure food safety and maintain food quality.

❸ Temperature and Door Sensors

Sensors constantly record changes to fridge and freezer compartments, including when the doors are opened and when new items are introduced. This information is continuously communicated to the microprocessor which, in conjunction with the variable-speed fans and air ducts, ensures that the temperature in each compartment is kept constant.

❹ **Adaptive Defrost**

Alarms on the refrigerator and freezer alert you if the door has been left open. Adaptive defrost means that there is no need for 'vacation mode' settings. The microprocessor will select the best time to defrost based on how the appliance is being used. When you are away, it will recognize lower levels of use and defrost less often, therefore requiring less energy.

❺ **Filtered Ice & Water**

Unique Ice & Water models have fully integrated in-door water dispensing and internal icemaking that do not use any space in your refrigerator, providing maximum food storage. The slimline water touch pad and angled water delivery means almost any size or shape of pitcher can be filled with chilled, filtered water. The internal icemaker is housed above the freezer and can fill various-sized bins for customized ice storage.

❻ **Ergonomic Design**

Uninterrupted wide-open spaces and numerous shelving options enable easy customization for different uses. Secure glass shelving contains drips and spills and prevents them from falling on items stored below. Quality extension runners allow you to slide out storage bins and trays fully for easy loading and unloading. The storage bins are removable, making food preparation and cleaning easier.

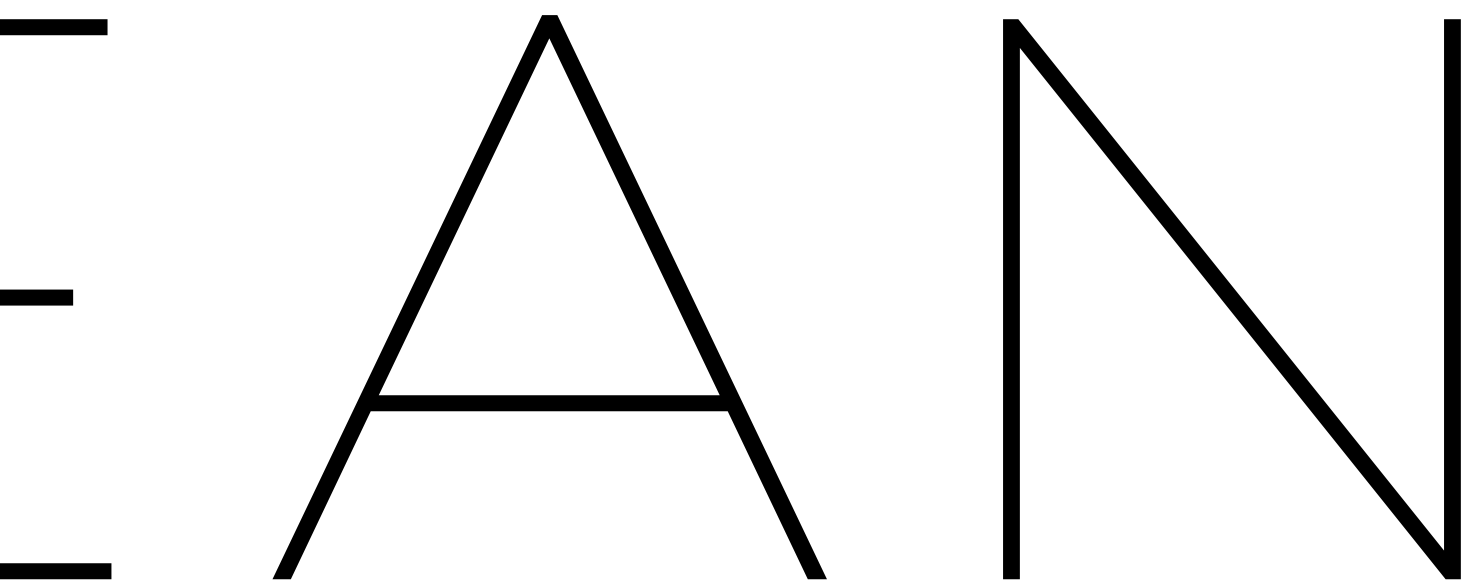
CLE



WE LIVE OUT OF DRAWERS

Fisher & Paykel DishDrawer™ dishwashers are designed to make doing the dishes easier than ever before. The combination of a drawer-based system with smart electronics and independent wash technology delivers unparalleled cleaning and better ergonomics. We call it DishDrawer™ Technology. Each of our DishDrawer™ products is a self-contained dishwasher with technology that allows traditional double-format or separate modules to be configured at an ergonomic height, allowing complete design freedom. Wide, tall, double and single-drawer options allow you to choose the combination that works best for your lifestyle. These dishwashers can be concealed easily behind kitchen cabinetry to seamlessly blend in with your kitchen and the ergonomic design minimizing bending by requiring less movement to open, load and close.

DISHDRAWER™
TECHNOLOGY

DishDrawer™ Wide

Designed for the whole family, the DishDrawer™ Wide dishwasher compliments the Fisher & Paykel CoolDrawer™ to deliver a total kitchen solution. Providing space for nine place settings, the DishDrawer™ Wide is suited to medium-sized households and can be partnered with additional drawers to cater for larger families.

❶ **Intuitive**

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

❷ **Convenient**

You can fit large plates of up to 12 7⁄16″ in diameter. Racking is designed to hold long utensils and can fold away to free up space.

❸ **Ergonomic**

The DishDrawer™ is as easy to open and close as a kitchen drawer and loading and unloading require minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

❹ **Efficient**

A choice of nine wash programs, including Eco options to minimize water and energy usage.

❺ **Safe**

For added safety, a key lock and child lock are included.

❻ **Eco-friendly**

This dishwasher uses only 3.5 gallons of water on a Normal Eco wash program and is ENERGY STAR rated CEE tier 1 for energy efficiency and cleaning and drying performance.

DishDrawer™ Tall

This model is designed for extra headroom. The increased drawer height fits 13″ plates, making cleaning up after dinner parties a breeze. The DishDrawer™ Tall dishwasher can also easily accommodate oversized platters and extra-long stemmed glasses.

❶ **Intuitive**

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

❷ **Convenient**

This model is taller than the standard DishDrawer™ dishwasher, so you can fit in large plates up to 13″ in diameter. Racking is designed to hold long utensils and can fold away to free up space.

❸ **Ergonomic**

The DishDrawer™ is as easy to open and close as a kitchen drawer and loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

❹ **Efficient**

A choice of nine wash programs, including Eco options to minimize water and energy usage.

❺ **Safe**

For added safety, a key lock and child lock are included.

❻ **Eco-friendly**

This dishwasher uses only 2 gallons of water on a Normal Eco wash programme and is ENERGY STAR rated CEE tier 1 for energy efficiency and cleaning and drying performance.

DishDrawer™ Double

Designed to fit existing kitchen cabinetry, the DishDrawer™ Double dishwasher has comparable dimensions to those of traditional dishwashers but provides the benefit of two independent drawers for added convenience and ergonomics.

❶ **Innovative**

This dishwasher is of world-first design and configuration.

❷ **Convenient**

The DishDrawer™ Double dishwasher lets the user match the wash program to the exact load type in each drawer.

❸ **Ergonomic**

The DishDrawer™ is as easy to open and close as a kitchen drawer and loading and unloading require minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

❹ **Intuitive**

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

❺ **Efficient**

This model has the choice of nine wash programs, including Eco options to minimize water and energy usage.

❻ **Safe**

For added safety, a key lock and child lock are included.

❼ **Eco-friendly**

This dishwasher uses only 2 gallons of water per drawer on a Normal Eco wash programme and is ENERGY STAR rated CEE tier 1 for energy efficiency and cleaning and drying performance.

DishDrawer™ Single

Designed for compact kitchens, the DishDrawer™ Single dishwasher is an ideal solution for kitchens where space is a premium. It can also be installed either side of a sink for convenient ergonomic loading and unloading.

❶ **Innovative**

This dishwasher is of world-first design and configuration.

❷ **Convenient**

The DishDrawer™ dishwasher lets the user match the wash program to the exact load type in each drawer.

❸ **Ergonomic**

The DishDrawer™ is as easy to open and close as a kitchen drawer and loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease. Single drawers can be placed in the most convenient locations, minimizing unnecessary bending.

❹ **Intuitive**

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

❺ **Efficient**

This model has the choice of nine wash programs, including Eco options to minimize water and energy usage.

❻ **Safe**

For added safety, a key lock and child lock are included.

❼ **Eco-friendly**

This dishwasher uses only 2 gallons of water on a Normal Eco wash programme and is ENERGY STAR rated CEE tier 1 for energy efficiency and cleaning and drying performance.

INTEGRATED MODELS

The integrated product solution enables seamless fitting between Fisher & Paykel products and your kitchen cabinetry. Your chosen aesthetic can extend beyond storage spaces to enable DishDrawer™ and CoolDrawer™ to blend in with your kitchen environment.

DishDrawer™ Features

❶ Independent Drawers

An independent drawer-based dishwashing platform is part of what makes the DishDrawer™ dishwasher unique. At countertop height, drawers glide open for easy access, visibility and better ergonomics. In DishDrawer™ Double dishwashers, both drawers operate independently so different wash cycles can operate simultaneously to accommodate a variety of loads. Glasses, pots and pans can be washed in separate drawers at the same time.

❷ SmartDrive™ Wash Mechanism

The unique brushless DC motor acts as both a wash pump and a drain pump, which means fewer moving parts and greater reliability. The pump brings water into the spray arm, which rotates at different speeds depending on the wash cycle selected, to deliver a superior clean and better dish care. In the DishDrawer™ Wide dishwasher, two independent spray arms force water throughout the tub, ensuring maximum efficiency and ultimate wash performance.

❸ Nine Wash Options

All DishDrawer™ dishwashers feature nine wash programs: Rinse, Fast Eco, Fast, Delicate Eco, Delicate, Normal Eco, Normal, Heavy Eco, Heavy. The range of settings enables the DishDrawer™ dishwasher to wash everything from fine glass and crystal to heavily soiled pots and pans at the touch of a button. Primary and secondary controls provide a simple interface for program selection and operation, while the ‘delay’ start setting means the dishes can be done when it’s most convenient.

❹ **Flow-through Detergent Dispenser**

The DishDrawer™ dishwasher detergent dispenser ensures that undissolved detergent does not enter into the tub; instead, it is mixed as the machine fills with water. This not only cleans each load better but also reduces the possibility of damaging delicate items such as aluminum, cutlery or porcelain glazes.

❺ **Superior Filtration**

One of the challenges in all dishwashers is a robust filter system that removes debris and avoids blocking. Together, the kidney filter and overmolded filter plate create a firm seal to ensure that debris does not enter the wash mechanism and cause backflow. It is designed to be removable for easy and hygienic cleaning.

❻ **Adjustable Racking System**

The DishDrawer™ dishwasher includes a range of flexible racking options. The cutlery basket can be customized for different utensils. Pitch-adjustable folding tines allow them to be folded flat to accommodate a full load of pots or folded upwards to hold glassware. Pitch-adjustable racks can accommodate normal plates or simply slide away; the rack can also stack deep bowls. Wine-glass holders ensure that short and long stemmed glasses are secure throughout the wash. Added retainer clips are ideal for holding chopping boards in position.

❼ **Safety Features**

The DishDrawer™ dishwasher incorporates unique safety features such as a child lock which both locks the drawer to prevent opening and disables the buttons. In addition, it includes three-stage flood protection: the high-strength hose withstands water pressure several times greater than normal, overfill detection cuts the water supply if limits are exceeded and the back-up switch activates the drain pump to remove any excess water.

OVEN FUNCTIONS

(functions will differ depending on model)

OB24 Built-in Oven and OR24 Dual Fuel Range

Oven Light

Remains lit while the oven is in use, but can also be used independently from the other cooking functions.

Bake

Heat is provided from the upper and lower elements. A traditional cooking mode, suitable for single shelf cooking of items like cakes, delicate items like sponges, custard tart and crème brûlée.

Broil

The broil element delivers heat for fast, healthy grilling. Perfect for tender meat cuts, toasting and crisping.

Ventilated Broil

The oven fan circulates hot air from the top element for high speed broiling and produces food with a finish that is similar to a rotisserie. Food is crisp and brown on the outside while the inside remains moist and tender.

Ventilated Cooking with Double Broil

The oven fan circulates hot air from the top element for high speed double broiling and produces food with a finish that is similar to a rotisserie. Food is crisp and brown on the outside while the inside remains moist and tender.

Convection Bake

A very flexible method of cooking. A concealed element surrounding the fan at the rear of the oven heats air which is then distributed evenly around the cavity. This is the ideal mode for multi-shelf cooking and complete oven meals.

Defrost

The oven fan circulates air around the oven, speeding up the defrosting process by up to 30%.

Self Clean

During the self clean cycle, the oven reaches higher temperatures than it does for cooking, breaking down soil and grease deposits which can be wiped away with a damp cloth.

OR24 and OR36 Gas Range

Bake

The heat is produced by the oven burner, A traditional cooking mode, suitable for single shelf cooking of items like cakes,delicate items like sponges, custard tart and crème brûlée.

Convection Bake

A very flexible method of cooking. The heat produced by the oven burner is distributed throughout the oven cavity by the fan. This is the ideal mode for multi-shelf cooking and complete oven meals.

Defrost

The oven fan circulates air around the oven, speeding up the defrosting process by up to 30%.

Broil

The broil element delivers heat for fast, healthy grilling. Perfect for tender meat cuts, toasting and crisping.

OB30 Built-in Oven models

Aero™ Pastry

Heat from the lower concealed element is circulated throughout the oven cavity by the Aero™ fan. Excellent for sweet and savory pastry foods, for moist breads and brownies and biscuits that you want extra chewy.

Roast

A two step program that has been developed to help you cook delicious roasts effortlessly. This function is a combination of grill and bake, grilling your food for the first 20 minutes then bakes at the set temperature for the rest of your cooking time. This sears the meat to keep in the juices.

Bake

The oven fan circulates hot air from the top outer and lower concealed elements and distributes it around the oven cavity. Aero™ Bake is great for crisping pastry in lemon meringue pie and vegetable filo parcels.

Aero™ Bake

The oven fan circulates hot air from the top outer and lower concealed elements and distributes it around the oven cavity. Aero™ Bake is great for crisping pastry in lemon meringue pie and vegetable filo parcels.

Pastry Bake

Uses the heat from the lower element only, this is a traditional cooking mode which is suitable for recipes that were developed in older ovens. For best results, cook on only one shelf at a time. Perfect for foods that require delicate cooking and have a pastry base, like custard tarts, quiches and cheesecake or anything that does not require direct heat and browning on the top surface.

Maxi Broil

Delivers intense heat from the entire top element. It is the most suitable mode for 'finishing off' many meals, for example browning the top of potato gratin and frittata as well as cooking smaller cuts of meat. Use Maxi Grill to toast bread or grill your favorite chicken, fish and steak.

Aero™ Broil

Produces food with a finish that is similar to a rotisserie. Meat, poultry and vegetables cook beautifully; food is crisp and brown on the outside while the inside remains moist and tender.

Broil

Delivers intense heat from the inner region of the top element. Great when you need to quickly grill smaller dishes, for example crème brûlée or one to two portions of your usual favorites, like crispy chicken breasts or a steak.

TrueAero™

A concealed heating element surrounding the fan in the rear of the oven heats air which is then blown into the cavity. The consistent temperature creates an ideal oven environment producing goods which are well risen and evenly colored.

Warm

A constant low heat of 165°F (75°C). It is excellent for keeping cooked food hot and warming plates and serving dishes.

Self Clean

During the self clean cycle, the oven reaches higher temperatures than it does for cooking, breaking down soil and grease deposits which can be wiped away with a cloth afterwards.

Note: Use all oven functions with the oven door closed.

30″ Double Built-in Oven

Model no:
OB30DDEPX2

Dimensions	inches
Ⓐ Overall height of product	48 7/16″
Ⓑ Overall width of product	29 ¾″
Ⓒ Depth of product front and control panel (excl. handle and dials)	1½″

A PEACE OF MIND SALE

CUSTOMER CARE
CALL 24 HOURS A DAY, 7 DAYS A WEEK.

Fisher & Paykel has a 24 hour enquiry service that allows customers to speak to a real person about any questions they might have about their products. Our Customer Care Representatives can offer advice on which appliance will best suit their needs, and provide extensive product knowledge on how to use a current Fisher & Paykel product. They can also arrange for a qualified service technician to install selected products and advise consumers where their nearest Fisher & Paykel stockist can be found. Nobody is better qualified to install, service and repair your Fisher & Paykel household appliance than our network of specially trained service technicians.
