

Perlick Features

BEER DISPENSER CABINET

- Provides increased capacity within one unit
- Provides reduced operation noise and better energy efficiency than having multiple single (24") cabinets
- Can be used as a stand-alone cabinet with stainless steel top and sides or built into cabinetry with galvanized top and sides
- All polished stainless steel interior
- Variable Capacity Compressor for quiet operation, greater energy efficiency, more stable temperatures, and greater temperature pull down capability
- Front vented, forced air refrigeration system
- Electronic digital control and temperature readout
- Adjustable cantilever shelving allows for customized shelving heights to match your cooling needs
- Wood overlay door kits allow for fully integrated appearance with surround cabinetry (optional)
- Two (2) year full warranty on complete unit
Additional four year limited warranty on the sealed refrigeration system
- Glass doors protect goods from UV light in outdoor applications
- Recessed interior lighting protects from accidental collision of goods with light bulb
- Door locks prevent unwated access
- Reversible doors allow door swing from either left or right as desired
