

One-touch cooking. LED brightness.

Sensor Cook

The right temperature with the push of a button

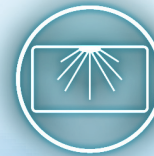

Whether it's the soup you just bought, last night's leftover pasta or a frozen dinner, Sensor Cook does the thinking for you so that you get optimal heated results every time.

Ceramic Enamel Interior

Scratch resistant and easy to clean

With Ceramic Enamel inside, it's easy to keep your microwave spotless. Now you can effortlessly remove grease or oil from surfaces.

LED Cooktop Light

Illuminates your cooktop

The industry's only LED cooktop light* – bright, soft and energy efficient.

**As of March 15, 2012.*

Available Colors:

Stainless

SAMSUNG

Sensor Cook

The right temperature with the push of a button

No more guessing how long it takes to heat up a dish – preset buttons give you the best results

Sensor Cook automatically sets the power and duration for every dish by sensing humidity and cooking vapors as they heat

No more half-frozen foods or half-chilled soups

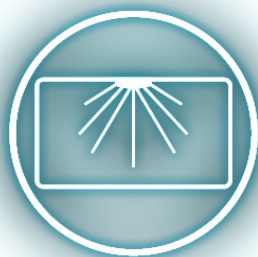

Ceramic Enamel Interior

Scratch resistant and easy to clean

More scratch and stain resistant than plastic or stainless steel

800-570-3355

LED Cooktop Light

Illuminates your cooktop

LED lights are significantly brighter than halogen or incandescent bulbs and save more energy*

Evenly distributes a soft, bright light across your cooktop

**Power consumption for Samsung standard OTR incandescent bulb is 40 W as compared to LED, which is 2.4 W (energy savings).*

Large Capacity

Big space for big results

2.1 cu. ft. inside accommodates large platters and dishes, which typically do not fit in the average, mid-size 1.5 cu. ft. microwave

Eco Mode Button

Conserves power intelligently with the push of a button

Conserves power by turning off display when not in use

More convenient than unplugging the microwave when not in use

800-570-3355

Vent Fan Power (CFM)

A fresher-smelling kitchen

400 CFM of power helps clear odors emitting from your cooktop
