

STA4645U

Fully Integrated 18" Dishwasher

EAN13: 8017709114664

Hidden electronic control panel

Accepts custom door panel

Self-balancing door

5 wash cycles including Crystal washing, and Extreme wash

Aquatest

Built-in water softener

Sanitation

Stainless steel tub and filter

Concealed heating element

Delay timer (up to 9 hours)

4 temperatures: 113°F, 131°F, 149°F, 158°F

Salt and Rinse Aid refill Indicators

Shuttle Wash System

Complete Water Leak Protection System

10 place settings capacity

Stainless steel baskets

Adjustable upper basket to accommodate plates up to 11 ¾" in diameter

1 Cutlery basket

2 flip down tines in lower basket

2 glass support racks in upper basket

2 extra cutlery holders in upper basket

Easyglide basket movement

Noise level 45dB (A)

Energy star rated

Height leveling legs

Voltage rating: 120V - 60Hz

Connected load (nominal power): 120V - 1.3kW

13 Amps supply required

Water usage: normal cycle: 4.3 gal.

AQUATEST:

All Smeg dishwashers have an aquatest feature. A specially developed infrared sensor measures the clarity of the water in the tub at regular intervals and decides whether to heat the water for the pre-wash cycle or to move on to heat the water for the wash cycle. The aquatest feature is incorporated in the AUTO cycle/s - it keeps consumption of water and energy to a minimum, depending on the degree of food soil on the dishes.

**DELAY
TIMER**

Delay Timer:

A standard feature on all Smeg dishwashers is a delay timer. This feature allows you to select the required wash program and delay the start of the cycle for up to a maximum of 12 hours. This way the dishwasher fits in with your schedule.

Energy Star and ISO14001 Certified:

The Smeg production process is carefully managed in order to keep the impact upon the environment as low as possible. The process is checked and certified by Independent International bodies IQNET and CISQ (Smeg complies with the standard ISO14001). All Smeg dishwashers are ENERGY STAR qualified. Energy efficiency is important to Smeg and our technicians are constantly working to keep the energy, and water, consumption of each dishwasher as low as possible. ENERGY STAR certified products use less water than conventional dishwashers, and approximately 40% less energy than the federal minimum standard for energy consumption. By choosing an ENERGY STAR certified product you are helping to preserve the environment without compromising on product quality or performance.

Sanitation:

Every dishwasher in the Smeg series has at least one wash program that incorporates a final sanitation rinse. A special final 10 minute rinse at 158°F is added to the end of certain programs to ensure the highest possible standards of cleanliness and hygiene. Smeg dishwashers are ETL sanitation certified.
