Refrigerator Shabbos Keeper Compatible Models – 2024

Note: For color indications, kindly see the information on the bottom sheet.

Compatible: The Shabbos keeper will seamlessly operate when connected to the refrigerator and set properly.

Capable: The unit may require reprogramming for proper functionality, depending on the serial number. Please reach out to Zman Technologies for further assistance.

Ice Maker: The Shabbos keeper doesn't deactivate the ice maker. Which can lead to halachic concerns.

1. For units with an icemaker on the Fresh Food door in an ice bucket or in the freezer compartment with a fixed ice bucket, it is necessary to deactivate the ice maker before Shabbos when planning on manually retrieving ice from the ice bucket. During Shabbos ice cannot be used through the dispenser.
2. For units that have a sliding ice bucket in the freezer compartment it is required to deactivate the ice maker prior to Shabbos, even if you do not plan to use the ice maker. This precaution is essential as the act of opening and closing the door may activate sensors, leading to increased ice production in the ice maker.

Your understanding and compliance with these guidelines are crucial. If you have any additional halachic questions or concerns, or if you encounter any issues after setting up the Shabbos Keeper, feel free to reach out to us. We are readily available and eager to assist with any concerns or questions you may have.

We can be contacted at Support@ZmanTechnologies.com or 855 381 0977.

Thank You,
Zman Technologies
