## Symbols glossary

 <p><b>Triple Fan Technology:</b> The oven is equipped with an exclusive three fan system, which, combined with the increased power of the motors, enables excellent cooking performance. The two large side fans distribute the air around the outer perimeter of the cavity while the smaller central fan increases ventilation by creating a vertical vortex of heat. Accordingly, the temperature within the cavity is uniform, allowing food to be cooked evenly on all five levels, like in professional kitchens.</p>	 <p><b>Heavy duty cast iron pan stands:</b> for maximum stability and strength.</p>
 <p><b>Installation in column:</b> Installation in column</p>	 <p><b>Air cooling system:</b> to ensure a safe surface temperatures.</p>
 <p><b>Defrost by time:</b> with this function the time of thawing of foods are determined automatically.</p>	 <p><b>Triple glazed doors:</b> Number of glazed doors.</p>
 <p><b>Enamel interior:</b> The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.</p>	 <p><b>Circogas:</b> In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.</p>
 <p><b>Fan with upper and lower elements:</b> The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.</p>	 <p><b>Upper and lower element only:</b> a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.</p>
 <p><b>Lower heating element only:</b> This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.</p>	 <p><b>True European Convection:</b> The combination of the fan and circular heating element around it provides many benefits, including no preheat if cooking time is longer than 20 minutes, no flavor transfer when cooking different foods at the same time, lower energy consumption, and shorter cooking times. Suitable for all types of food preparations.</p>
 <p><b>Grill element:</b> Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.</p>	 <p><b>Half grill:</b> For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.</p>

Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Pizza function: The simultaneous operation of three elements ensures an optimum cooking facility when used with the Smeg pizza stone.

Rotisserie: The rotisserie (where installed) works in combination with the grill element to brown foods to perfection.

Side lights: Two opposing side lights increase visibility inside the oven.

The oven cavity has 5 different cooking levels.

Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly.

Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.

Vapor Clean: a simple cleaning function using steam to loosen deposits in the oven cavity.

## Benefit (TT)

---

### **True-convection**

The best cooking performances guaranteed by ventilated circular flow.

Multiple fans and heating elements guarantee the perfect aerodynamic heat flow, allowing homogeneous and quicker cooking inside the cavity.

### **Ever Clean Enamel**

Easy oven cleaning thanks to special pyrolytic enamel

### **Touch control**

Easy and intuitive timer setting with a single touch

### **Isothermic Cavity**

The best cooking performance at the highest energy efficiency

### **Triple Turbine**

The oven has three fans and two circular heating elements, allowing cooking with rotating heat

### **Tangential cooling**

New cooling system with tangential fan and airflow from the door to the splashback

### **Soft close**

The door is equipped with a specific system for silent closing

### **Multilevel halogen light**

Internal halogen lighting on different levels guarantees excellent visibility

### **Telescopic guides**

Easy extraction and safe insertion of trays into the oven thanks to telescopic guides

### **Adjustable height**

Cooker top flushed with the working area thanks to adjustable feet

### **Multilevel cooking**

Several cooking levels allow maximum flexibility of use

### **Cold door**

During any function, the external door glass is cold, avoiding any risk of burns

### **AirFry (AIRFRY optional accessory)**

Lighter and tastier food thanks to airfry basket

**Drawer storage compartment**

More space thanks to the lower compartment, ideal for storing accessories or cooking utensils

**BBQ (optional accessory)**

Barbeque cooking directly in the oven with the double-sided grill

**Pizza stone (optional accessory)**

Baking with refractory stone for soft and crispy pizza and yeast products (STONE optional accessory)
