

Honeywell / MO08CESWB6

Honeywell 8,000 BTU Portable Air Conditioner, Dehumidifier & Fan

Honeywell portable air conditioner covers all the bases - AC and a multi-speed fan keep you cool in summer, a dehumidifier ensures your space stays dry during wetter, potentially mold-inducing months. This AC keeps you comfortable in rooms up to 400 square feet, covering more square footage than comparable models on the market. Designed with portability in mind. The Honeywell MO series is one of the lightest in its class and comes with smooth-gliding wheels that make sliding the unit from room-to-room a breeze. It's easy to keep your energy costs low when you're not wasting effort cooling down empty rooms. This Honeywell portable air conditioner comes with everything needed including a flexible exhaust hose and an easy-to-install window venting kit. The window vent can be removed when the unit is not in use.

- 9,100 (ASHRAE-128 Standard) / 6,100 BTU (SACC BTU)
- 3-in-1 Functions: AC Cooling, Fan & Dehumidifier
- Dehumidification capacity: Up to 44 pints per day
- Easy install window vent kit for vertical/horizontal windows - Adjustable bracket (from 19.7" to 38.2" or 47.2"), Exhaust Hose (Length 12" to 47")
- Washable Dual Filtration System - Easy to clean regularly under a faucet, Protects & extends life of the AC
- Smart Digital Thermostat control with digital display & soft touch control panel
- 24 Hour Energy-Saving Timer
- Full function Remote Control with display
- Backed by US service hotline that connects directly to Honeywell Portable AC in-house support team, ready to assist you
