

# Important Information About Your New Washer...

Thank you for purchasing a Speed Queen topload washer! To register your product, go to [www.speedqueen.com](http://www.speedqueen.com).

## The Normal Eco Cycle

The Normal Eco Cycle is designed to meet the U.S. Department of Energy requirements for energy usage and water consumption. You will notice that this cycle uses less hot water to save energy and a spray rinse to reduce water consumption.

### How does it work?

- The washer begins filling with cold water and a small amount of hot water, depending on the temperature selected.
- The washer finishes filling with all cold water and goes into agitation.
- During the rinse portion of the cycle, the wash tub won't fill with water. Instead, there is a spray rinse.

These functions are unique to the Normal Eco Cycle and the Eco Special Cycles (see reverse side for details). All other cycles have no temperature restriction and utilize a full tub rinse.

Refer to the washer's User's Guide or go to [www.speedqueen.com](http://www.speedqueen.com) for more product information.

### Please Note: Service Repairs NOT covered under factory warranty:

- Plugged or restricted drain pipes
- Plugged or restricted water filters or fill valve screens
- Home electrical issues
- Foreign objects found inside the washer or pump
- Cleaning fabric softener dispenser
- Low water pressure
- Machine leveling

**Part No. 204471**  
**November 2017**

## Special Cycles Reference

When you select the Special Cycles keypad, pressing the up and down arrow keypads will allow you to choose from eight different cycles. The display will show *P* and a number relating to the cycle. Refer to the table below.

Display	Special Cycle Name	Special Cycle Description
<i>P1</i>	Eco Heavy Duty	This cycle uses a spray rinse to reduce water consumption. It also uses less hot water. It has a longer wash time than the Normal Eco cycle. If using fabric softener in this cycle, select the Extra Rinse option.
<i>P2</i>	Eco Delicate	This cycle uses a spray rinse to reduce water consumption. It also uses less hot water. It has a shorter wash time and a gentler wash action than the Normal Eco cycle. If using fabric softener in this cycle, select the Extra Rinse option.
<i>P3</i>	Waterproof	Wash waterproof items such as rain coats and bed liners with this cycle. It includes a gentle agitation, very low spin, and lower water levels.  For best washing results, add another item such as a cotton sheet on top of the waterproof items to make sure they get fully submersed in the water and that no air is trapped under the waterproof items.
<i>P4</i>	Super Soiled	Use for very heavily soiled items. It includes a 15-minute Soak at the beginning of the cycle, a longer wash time than Heavy Duty and a Extra Rinse.
<i>P5</i>	Whites	This cycle is designed to keep white laundry white. It utilizes a longer wash time. Use for items such as sheets and towels.
<i>P6</i>	Wool	Wash wool items using this cycle. It includes cold water, a 30-minute soak, a very short gentle agitation, a one-minute spin, a cold rinse, and an extended spin time.
<i>P7</i>	Athletic	This cycle includes a cold wash and a shorter, gentle agitation.
<i>P8</i>	Denim	This cycle is similar to the Heavy Duty cycle but with a cold wash and longer spin time.
