Finish drying using the Time Dry program. ■ Select a more suitable program next time.

Useful tip: You can alter the drying levels for some programs. See "Programmable functions", sections "P01 Drying levels Normal" and "P02 Drying levels Wrinkle-free" in the Operating Instructions..

Items made of synthetic Synthetic fibers tend to attract static charge. **fibers are charged with** Static charge can be reduced by adding a fabric softener to

static electricity after the final rinse in the washing program.

Lint is principally the result of friction when garments are being worn and to some extent when they are being washed. Machine drying hardly causes any lint to form. Lint is collected by the **lint** and plinth filter and can be

removed easily. See "Cleaning and care".

You can hear operating This is not a fault. The compressor (heat pump) is operating noises (buzzing/humor you have selected the SoftSteam program.

No action required. These noises are quite normal and can be heard when the compressor or the condensed water

pump is operating.
