- o 115V/60 Hz; 15 amp dedicated circuit
- o Maximum amp usage—7.9
- o Estimated energy usage—452 kWh/year

PLUMBING

- Inlet waterline requirements—1/4" copper tubing
- 35 psi min.; 100 psi max.

Installation Requirements

ACCESS REQUIREMENTS

VCBF136 Professional

When installing into a cutout, the edge of the door must be 2-7/8" (7.3 cm) from the adjacent countertop cabinet.

Allow 1/2" (1.3 cm) space at top and 1/2" (1.3 cm) behind the machine compartment cover (located in the rear) for proper air circulation. Sub-flooring or floor coverings (i.e. carpet, tile, wood floors, rugs) may make your opening smaller than anticipated. Some clearance may be gained by using the leveling procedure under **Leveling** in the Installation Guide.

VCBF136	
Cutout width	36" (91.4 cm)
Cutout height	70-1/2" (179.0 cm)
Addition of tops/grilles	72" (182.9 cm)
Cutout depth	24" (61.0 cm)
