

It's the total fabric solution. There's even a cycle for cycling clothes.

#### Specialty Fabric Cycles

The ultraSense® washer features an array of cycles engineered specifically for different fabric types. A darkColor™ cycle cleans thoroughly without fading. An outdoor wear cycle cleans modern fabrics properly. And a 170° sanitary cycle kills 99.99% of bacteria.

#### Digitally Automated Washing

Simply select the fabric cycle, and a network of digital sensors sets and monitors every aspect of the wash, including water level, load balancing and number of rinses based on suds level.

#### Extra Large Drum, Extra Large 16" Opening

The ultraSense® washer can handle the largest loads. The huge 3.81 cu. ft. capacity can wash 27 bath towels or a king-size comforter easily. And a 16" wide door opening makes it easy to load and unload large loads.

#### Energy Star Certified

The ultraSense® washer is the most efficient washer in its class, exceeds Energy Star requirements, and through water and energy savings, pays for itself in just eight years.

#### German Engineering

The components have been tested to last at least 4,000 washes (that's a load every day for more than a decade). And each washer is individually run-tested before it leaves our factory. No detail of a Siemens ultraSense® washer is overlooked.

ultraSense® Washer

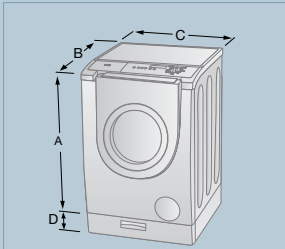

The future moving in.
