Whirlpool® Side-by-Side Refrigerator Advantages

Model GF6NFEXRY in monochromatic stainless steel available Q4 2006

Whirlpool® side-by-side refrigerators are equipped with a host of innovative time-saving features, modern designs, and efficient operation. Choose the perfect fit for your style, get more storage space in both the freezer and refrigerator, and experience a one-of-a-kind ice and water dispensing system.

Whatever your choice, Whirlpool brand side-by-side feature packages give you more for your dollar investment and provide years of reliable operation.

Most Whirlpool brand side-by-side refrigerators are ENERGY STAR® qualified to use less energy and save you money.

No one has
Fewer Repairs
Rated by a leading consumer magazine January 2006

The quality and reliability of Whirlpool® side-by-side refrigerators is unrivaled. No one has had fewer repairs, as rated by a leading consumer magazine, for the past 9 years!

Styling

Choose Your
Styling Preference

Counter Depth

The flush design offers built-in style with added space to maneuver in the kitchen. A spacious interior and a full set of innovative features completes the package.

Contoured

The fitted curves of a formed door or the sleek, rounded edges of a smooth door project an elegant style.

Available
Q4 2006

Classic

Flat doors, plenty of storage space and popular features prove that traditional doesn't mean out of style.

Storage Space

We Moved the Ice Bin to the Door So You Can Store up to 8 More Frozen Pizzas*

In-Door-Ice® Ice Dispensing System

The ice bucket sits in the door, holding plenty of filtered ice out of the way. A push of a button removes it to easily fill coolers or multiple glasses.

More Freezer Capacity

With the ice in the door, freezer space is wide open to store up to 8 additional frozen pizzas.*

*Space advantage in Whirlpool® 25/26 cu. ft. models compared to same-size Whirlpool® models with conventional ice makers.

Convenience

Fill Any Size Container Twice as Fast with the Fast Fill Dispensing System**

2X Flow Rate

Water dispenses twice as fast as our previous dispensers, providing you with the convenience of chilled, filtered water in half the time.

Measured Fill

Select the exact amount of filtered water — in ounces, cups or liters — and the dispenser automatically shuts off when complete. Perfect for pasta or baking recipes.

Rotating Faucet

The faucet rotates 180°, allowing you to easily fill everything from a standard water glass to a large stock pot.

Slide-Out Dispenser Tray

Go hands-free with a dispensing tray that extends 1–3 inches, depending on the model.

**Compared to our previous dispensers. Patent pending.

Counter Depth Side-by-Side Refrigerators

Counter Depth Advantages:

Increased Exterior Space:

Flush Fit Design

- Fits flush with kitchen cabinets for a streamlined, built-in look
- Gives you back up to 6 inches in the kitchen

Two Sizes to Choose From

- 72" high counter depth models combine a flush look with a full 25 cu. ft. of capacity
- An industry exclusive *true* 69" tall model slides into an existing side-by-side cutout — top hinges and all

Abundant Interior Storage Space:

Drop Down Electronic Controls

- Controls recess into the top of the refrigerator compartment when not in use, providing added storage clearance on the top shelf for taller items

Flexible Storage Components

- Gallon door bins adjust up and down
- Glass shelves slide in and out
- Deep crispers keep fruits and vegetables fresh

Top-Freezer Refrigerators

Whirlpool top-freezer refrigerators include innovative features such as interior water dispensers and base grille filtration. Many models also offer adjustable door bins, giving you the flexibility to customize door storage the way you want it.

If you prefer the traditional style of the freezer on the top and the refrigerator on the bottom, Whirlpool brand has you covered, with a wide variety of sizes and colors from which to choose.

Look for ENERGY STAR® qualified Whirlpool brand top-freezer refrigerators that use less energy to save you money.

No one has
Fewer Repairs
Rated by a leading consumer magazine January 2006

The quality and reliability of Whirlpool brand top-freezer refrigerators is also top-quality: No other brand has fewer repairs for each of the last 4 years.

Top-Freezer Refrigerators

Door Styles

Top-freezer refrigerators offer two door handle styles. Bow handles let you access your favorite foods at any height. Integrated handles add a touch of style to refrigerator fronts.

Reach-Through Bow Handle Style

Integrated Cup Handle Style

Top-Freezer Performance Features:

Water Filtration Systems

- Choose from exterior or interior dispensing systems
- Delivers 6 months of fresh water
- Base grille filter location is easy to reach and change
- Filter light illuminates when a replacement filter is needed

SpaceSmart™ Cooling System

- Tri-level recessed vents channel cold air evenly throughout the refrigerator to keep foods cold
- The space-saving design offers performance without sacrificing storage space inside the refrigerator

Accu-Chill™ Temperature Management System

- Double tub construction isolates refrigerator and freezer compartment temperatures
- Foam-in-Place door construction provides excellent insulation and more precise temperature control
- With fewer cracks and crevices, the interiors are easy to clean

Bottom-Freezer Refrigerators & 50-lb Ice Makers

As a statement in style or a combination of convenience, bottom-freezer refrigerators from Whirlpool brand stand out from the crowd. A wide-opening refrigerator on top offers eye-level browsing, while the full-width freezer basket (in door or drawer styles) delivers flexibility in cold storage. And with each model meeting ENERGY STAR® qualifications, you can rest easy knowing you're saving both money in utility bills and doing your part to conserve our natural resources.

Whirlpool brand high-performance ice makers produce up to 50 pounds of clear, cubed ice within 24 hours. Host a whole weekend of parties and never run out of ice.

All Whirlpool brand bottom-freezer refrigerators are ENERGY STAR® qualified to use less energy and save you money.

Bottom-Freezer Refrigerators

Bottom-Freezer Features:

Choice of Freezer Access

- Slide-out drawer models offer easy access to stored items in the rear
- Swing-out door models offer traditional storage solutions

Slide-out SpillGuard™ Glass Shelves

- Raised edges can contain up to 12 ounces of liquid and help prevent leaks from spilling to the shelves below
- Slide-out design makes clean-up easy

Adjustable Door Bins

- Clear bins and shelves hold gallon containers
- Move them up or down to customize storage space

G11500PH - 50 lb.

G11500XH - 50 lb.

Water Filters

Six Months of Water — Right in Your Hand

If you want the best performance from your car, change the oil every three months. If you want the best security online, change your password every four months. To get the best-tasting water and highest quality ice from your Whirlpool brand refrigerator, change the water filter every six months.

Your refrigerator's water dispenser provides an economical source of water. Over its 6-month life, the water filter processes as many as 200 gallons.* Save money and hassle by buying — and carrying — fewer bottles of water. Cold, filtered water is right at your fingertips with a Whirlpool brand refrigerator's water filtration system.

Fewer bottles of water in your refrigerator means more storage space. Items are easy to see and rearrange when you get your drinking water from your refrigerator's water dispenser. Most filtration systems even have an indicator light reminding you when a replacement filter is needed. Whirlpool brand water filters are conveniently located on the exterior in the base grille and are simple to replace.

If you are not sure about the correct replacement water filter for your refrigerator, please call 1-800-253-1301 (8 am–6 pm EST, Monday–Friday) or visit our web site at www.whirlpool.com.

*May vary with local water conditions and usage.

Replacement Water Filters

PUR® Water Filters

PUR® filters with push button replacement reduce lead, chlorine taste, and odor. They are NSF Certified and retain beneficial fluoride in the water. Using the correct filter in the Fast Fill refrigerator assures proper flow rate.
For Fast Fill dispensing refrigerators: 4396841
For side-by-side PUR® filter models: 4396710

UltraEase™ 1/4 Turn Water Filter

Reduces cysts, lead, chlorine taste, and odor. This filter is NSF Certified and retains beneficial fluoride. (4396510)

The contaminants reduced by these filters are not necessarily in all users' water.

Push Button Replacement

Water filter replacement becomes even easier with the push button system. There's no need to shut down the water supply. Simply press the button and the old water filter is released. Then insert a new water filter by clicking it into place.

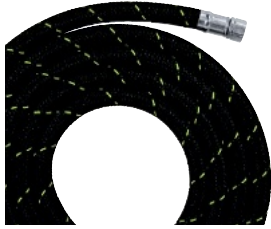

Whirlpool brand water filters are NSF Certified

A single Whirlpool brand water filter processes up to 200 gallons of cold, filtered water.*

Ice & Water Hook-up Kits

Industrial Grade Refrigerator Hose

Includes everything needed for easy installation: 7-ft braided tubing and fittings provides water to ice makers and ice & water dispensers. (8212490RC/8212490RP)

Copper Refrigerator Water Supply Kit

Use this kit to hook up your automatic ice maker or ice & water dispenser. Kit includes 15 feet of copper water supply line, a saddle valve with coupling union, Teflon® tape and all the necessary hardware. (8003RC/8003RP)

Refrigerator Water Supply Line

Use this 5-ft PEX tubing and fittings to provide water to your automatic ice maker or ice & water dispenser. (8212547RP)

Cleaning

Stainless Steel Cleaner

Maintain that brand-new stainless steel shine with this specially formulated cleaner. Whirlpool Corporation tested numerous cleaners and found the best to offer to you. Works on food spills, grime and stains. (31462)

All Purpose Appliance Cleaner

Give your kitchen that brand new shine with a hint of citrus scent. This all-purpose appliance cleaner cuts through grease and grime to clean most surfaces, from appliances to countertops. It can even be used inside the refrigerator or MHC. (31662)

Glossary

Accu-Chill™ Temperature Management System

Foam-in-Place doors and Double Tub construction provide accurate temperature control for storing food and beverages in both the refrigerator and freezer compartments.

Adaptive Defrost Control (ADC)

The Adaptive Defrost Control adjusts the frequency of defrost by monitoring the compressor run-time and the evaporator heater on-time. Depending on usage, ADC models can have fewer defrosts, resulting in improved food preservation and energy savings.

Adjustable Door Storage

Adjustable door bins move where and when you need them, giving you the flexibility to store beverages anywhere in the refrigerator door.

Automatic Ice Production

The Icemagic® system produces ice 50% faster than previous Whirlpool brand models, perfect during parties or any time extra ice is needed.

Clear Humidity-controlled Crispers

These crispers are extra deep so you can store more of your favorite fruits and vegetables. The ability to control the humidity levels helps you preserve their freshness. Choose a higher level for leafy vegetables and a lower level for fruits. The clear design keeps everything in sight.

Clear Temperature-controlled Meat Pan

Preserve the freshness of your meat in a temperature-controlled pan. Cool air from the freezer enters the meat pan at the level you select.

Contoured Door Styling

Refrigerators featuring contoured doors exhibit a stylishly sleek silhouette. Rounded edges and hidden hinges combine with a high-gloss finish to complement any kitchen decor.

Double Tub Construction

With double tub construction, a layer of foam is injected between the freezer and refrigerator compartments. The added insulation creates a stronger structure and decreases temperature swings.

Drop Down Electronic Controls

Electronic temperature controls drop down for easy access and viewing. The innovative design allows you to hide them away when not in use.

Electronic EZ-Touch™ Water Dispenser

Conveniently access chilled, filtered water on the outside of the refrigerator. A child-lockout feature prevents accidental operation. Some dispensers include an automatic LED night-light that adjusts brightness as the kitchen goes dark.

ENERGY STAR® Qualified

Refrigerators with this rating exceed minimum federal energy standards by at least 15%.

EZ-Change™ Filter and Indicator Light

The EZ-Change™ filter is included with each UltraEase™ filtration system. It removes odors and provides great-tasting water for up to 6 months. A quarter turn easily removes the filter when the indicator light says it is time for a replacement.

EZ-Tote® Door Bins

Built-in handles allow for the ultimate in portability. Move condiments or other items directly from the refrigerator door to the table. Multiple placement options for storing the bin keep door storage flexible.

Fast Fill Dispensing System

This new and revolutionary dispensing system utilizes a high-flow water valve that delivers chilled, filtered water without the wait. Combined with a dispenser area that's 50% larger in size, a slide-out tray and rotating faucet, the entire system fills any size container twice as fast as previous Whirlpool brand dispensers.

Flexi-Glide™ Pull-out Freezer Floor

Conveniently reach items in the back of the freezer with a floor that glides back and forth.

Foam-in-Place Doors

Foam is injected into the door cavity to provide an increased layer of insulation, keeping the cold air right where you want it.

Formed Door Styling

Select side-by-side refrigerators feature a uniquely-styled, European-inspired door with elegant curves and angles.

Hidden Controls

Electronic temperature controls are out of sight, thanks to the innovative design of hidden controls. When adjustments are needed, these controls drop down for easy access and viewing.

In-Door-Air® Door Cooling System

A special baffle channels cold air from the freezer into the refrigerator door, making it as cold as the rest of the refrigerator.

In-Door-Ice® Ice Dispensing System

This ice dispensing system is located in the door of the freezer. As a result, extra space on the top shelf gives you the freedom to store more of your favorite foods.

Measured Fill

An integral part of the Fast Fill dispenser, Measured Fill technology lets you select the exact amount of filtered water — in ounces, cups or liters — that you need. The dispenser will accurately fill the container and automatically shut off when complete.

No Slip Blue Door Bin Mats

Items stored in the door bins stay upright when resting on a no slip mat. Keep condiments and drinks neatly in place. The mats are also removable for easy cleaning.

Pulse Defrost System

The Pulse Defrost System includes Adaptive Defrost Control, plus a pulse defrost feature that cycles the evaporator heater on and off during the defrost cycle to minimize freezer temperature swing. More consistent freezer temperatures result in fewer ice crystals, less freezer burn and energy savings.

PUR® Water Filtration System

The PUR® water filtration system reduces additional impurities from household water, giving you chilled, filtered water direct from your refrigerator. The base grille filter is located out of the way, yet easy to reach for filter replacements.

Satina™ Stainless Look Finish

The low-maintenance Satina™ finish resists fingerprints for a smooth, glossy appearance. It gives your kitchen classic beauty with everyday practicality.

SideWise™ Electronic Controls

These controls are located in the upper left corner of the refrigerator to create more usable space on the top shelf.

SpaceSmart™ Cooling System

Tri-level, recessed vents channel cold air evenly throughout the refrigerator to keep foods cold without taking up storage space.

SpillGuard™ Glass Shelves

These glass shelves feature raised edges which can contain up to 12 ounces of liquid, preventing leaks from spilling onto shelves below. Some models feature slide-out shelves for even easier clean up.

SpillMizer™ Glass Shelves

Messy leaks are minimized with SpillMizer™ glass shelves. These adjustable, transparent shelves help contain spills for easier cleanup.

Sylvania Daylight™ Interior Lighting

This interior lighting system provides a whiter, more natural light that helps make every item easily visible and quick to locate.

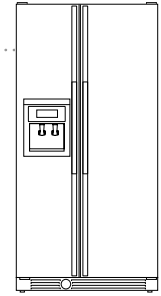

UltraEase™ Water Filtration System

The UltraEase™ water filtration system reduces unwanted impurities and odor from your water for up to 6 months. Located in the base grille, the filter is easy to reach and replace.

Up-front Temperature Controls

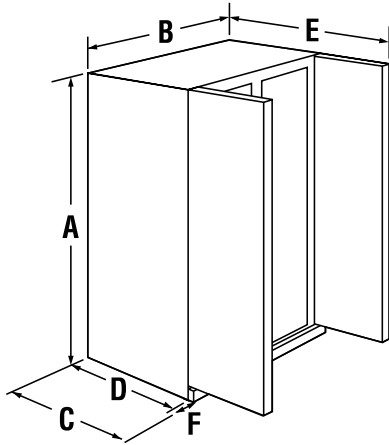

These controls are located towards the front of the refrigerator, making temperature management easy.

Counter Depth Refrigerator Specifications

Counter Depth Model Dimensions & Capacity

(All dimensions in inches)

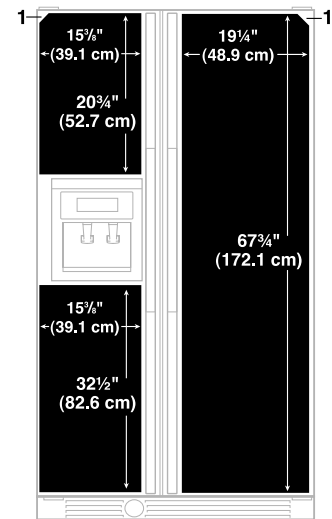

Model Number	Dimensions						Capacity		
	A	B	C	D	E	F	Total Volume (cu. ft.)	Freezer Volume (cu. ft.)	Total Shelf Area (sq. ft.)
