

Under-Counter Wine Coolers

professional series

E24WC50QS (RIGHT DOOR SWING)
E24WL50QS (LEFT DOOR SWING)

PRODUCT DIMENSIONS

Height	33-3/4"
Width	23-7/8"
Depth (Including Handle)	26"

MORE EASY-TO-USE FEATURES

Integrated Custom-Set™ Controls

Our control panel is thoughtfully located at the top of the door, leaving you with a clean look that fits any style.

UV Filtered Glass Door

Helps protect wine's flavor from deterioration caused by harmful UV-rays.

Display Lighting Option

Feature allows you to showcase wine on display.

Luxury-Close™ Door

Door softly closes with just a touch.

Alarm System

Notifies you if there's been a power failure or if a door stays open longer than five minutes.

Signature Blue LED Display

Signature blue display lighting illuminates the function buttons.

A.D.A. Compliant

When properly installed, this model is A.D.A.-qualified based on the United States Access Board's A.D.A./A.B.A. Accessibility Guidelines and the Department of Justice's 2010 A.D.A. Standards for Accessible Design.

Signature Features

Custom-Set™ Temperature Control

Set a temperature anywhere between 40 and 65 degrees — the wine cooler will maintain your selected temperature to keep your wine chilled just the way you like it.

Smooth-Glide® Racks

With a ball bearing system, racks smoothly extend with the touch of a finger for effortless access.

48-Bottle Capacity

Store up to 48 bottles of your favorite vintage.

Theatre Lighting

Transition LED lighting gradually illuminates the interior with soft but ample light as you open the door.

Under-Counter Wine Coolers

E24WC50QS (RIGHT DOOR SWING)
E24WL50QS (LEFT DOOR SWING)

Under-Counter Wine Cooler Specifications

- Product Weight – 115 Lbs.
- Voltage Rating – 115V/60Hz/15 Amps
- Connected Load (kW Rating) @ 115 Volts = 0.15kW
(For use on adequately wired 115V, dedicated circuit having 2-wire service with a separate ground wire. Appliance must be grounded for safe operation.)
- Amps @ 115 Volts = 1.5 Amps
- Electrical cable supplied.
- Always consult local and national electric codes.
- Unit is designed for either freestanding or built-in, under-counter installation with right or left door swing.
- Built-in, under-counter installation does not require additional airspace for top, sides or rear of unit.
- Proper built-in, under-counter installation requires that both electrical outlet and plug be completely recessed to ensure unit will fit flush against rear wall.
- To allow for ease of installation and removal, it is recommended that cabinet rough opening dimensions be increased by at least 1/4" over product's dimensions.

- For proper ventilation, unit can NOT be installed behind closed doors; front grille MUST remain unobstructed.
- Must be positioned on flat, level surface, capable of supporting entire weight when fully loaded.
- Leveling legs supplied to adjust height and level unit.
- Do not position unit near any heat source to ensure optimum performance.
- Unit requires zero clearance when installing flush with cabinet or wall.
- When installing against cabinet or wall that extends beyond front edge of unit, 2-1/2" minimum handle clearance required to allow for 90° door swing, providing sliding shelves with necessary clearance.

Note: For planning purposes only. Refer to Product Installation Guide on the web at electroluxicon.com for detailed instructions.

General Installation Guidelines

For Installation with Counter-Depth Side-by-Side Refrigerator

Use these dimensions and clearance instructions for planning purposes only. For detailed installation instructions, refer to installation guide, packed with product, or on the web at electroluxicon.com.

Front

When installing built-in cooking appliances in combination, 2"-high minimum visible gap between appliance faceplates required.

Clearance information for cooking appliances, provided in specific product's installation guide.

When installing ventilation unit above cooking product, provide 30" to 36" clearance between cooking surface and bottom of ventilator.

Top

*When installing side-by-side refrigerator adjacent to wall, cabinet or another appliance that extends beyond front edge of unit, 20" minimum clearance recommended to allow for optimum 120° to 180° door swing, providing complete drawer / crispener access and removal. (Absolute 4-1/2" minimum clearance will ONLY allow for 90° door swing which will provide limited drawer/crisper access with restricted removal.)

When installing appliance with sliding drawer or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swing.

Front

To ensure optimum performance, avoid installing refrigeration appliances in direct sunlight or near heat source.

Top

When installing appliance with side-swing door adjacent to wall, cabinet, or other obstruction that extends beyond front edge of appliance, door swing and handle clearance must be sufficient to allow access to appliance interior.

When installing appliance with sliding drawer or drop-down door directly across from obstructions, provide sufficient clearance for drawer extension or door swing.

When installing appliance with sliding drawer or drop-down door adjacent to wall, cabinet, or other obstruction that extends beyond front edge of appliance, allow 2" minimum clearance between drawer or door and obstruction.
