

Electrical Outlet Specifications

All Futuro Futuro range hood products are equipped with a US/Canada standard, 110-volt, 3-pin power cord.

The power cord **MUST** be plugged into a 110V, 5A, grounded outlet.

Do not cut the power cord and attempt to hardwire the range hood, as this will void the warranty.

The electrical outlet must be located on a separate, **DEDICATED** line, not shared with any other appliances, dimmable lights, or GFI outlets.
