Designer Oven Accessory
Flush Mount Kit

Removing Existing Trim

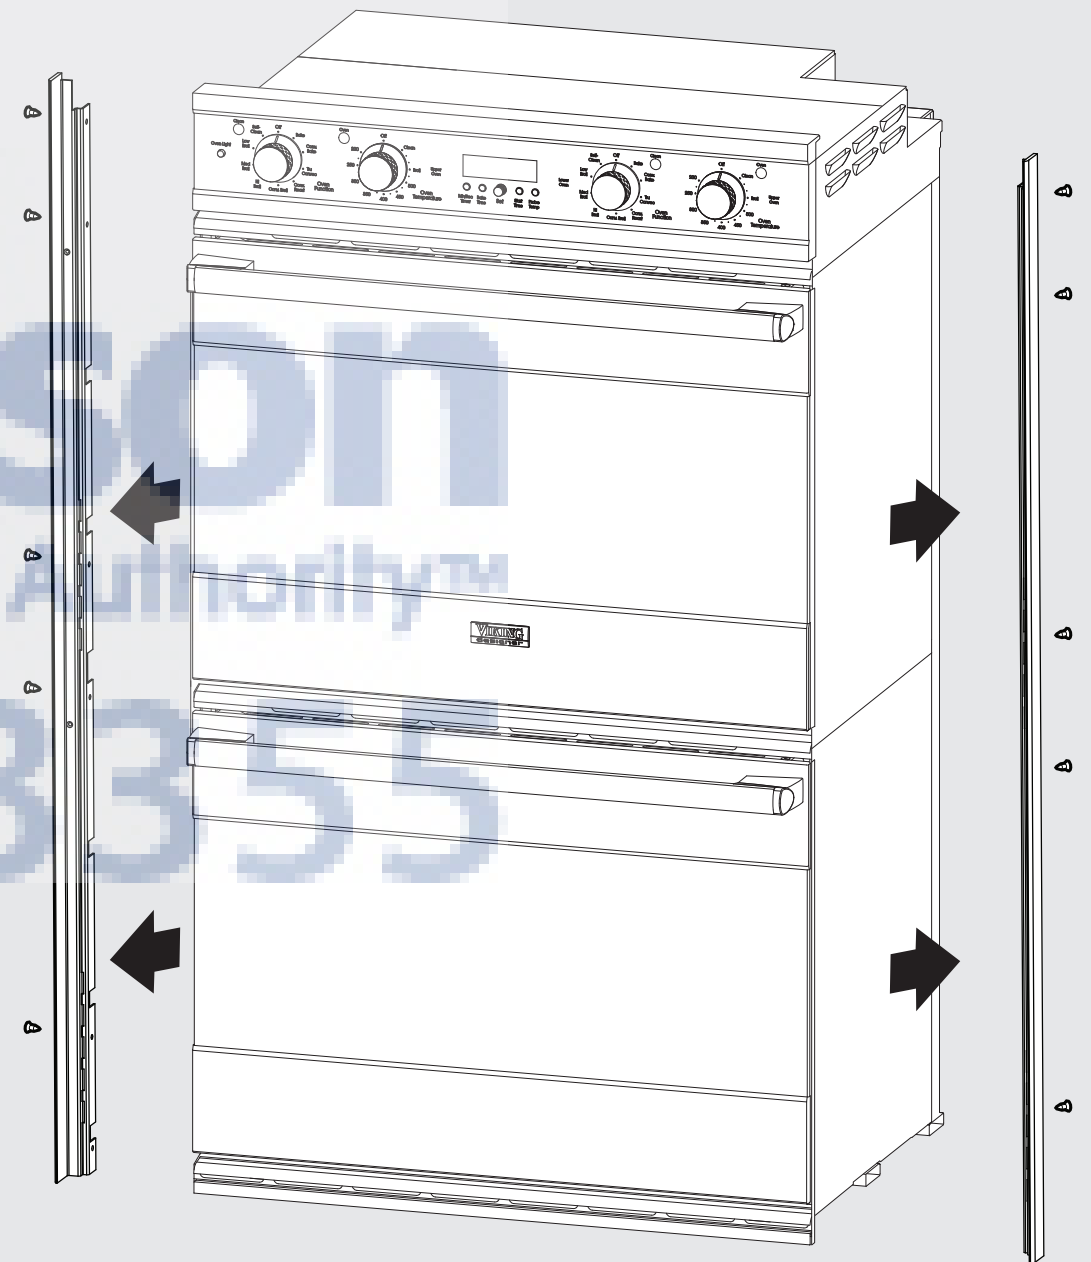

Remove the two existing side trim pieces from the oven. There should be one trim piece on each side of the oven.

NOTE: Keep the screws that are left after removing the existing side trim pieces. These screws will be used to install the flush mount accessory trim pieces.

Double Oven

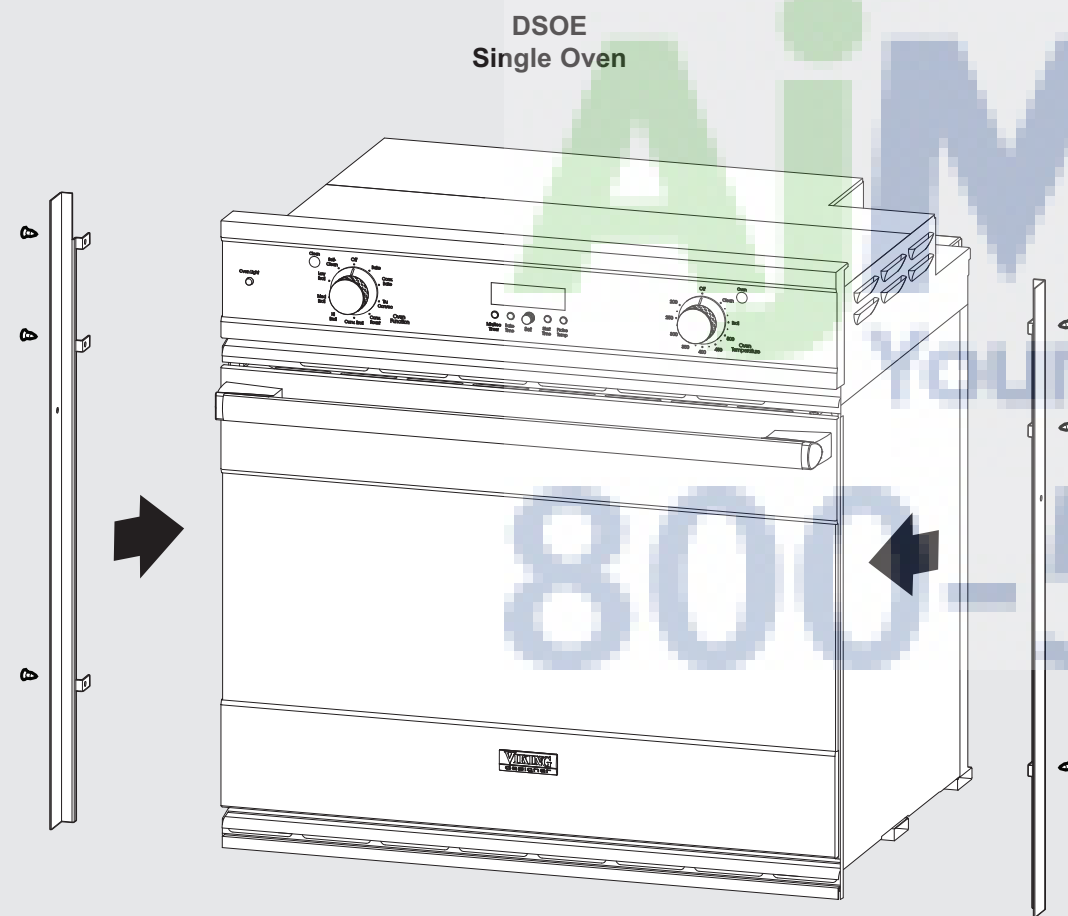

Installing Flush Mount Trim

After removing the existing side trim pieces, install the two flush mount trim pieces to the oven.

1. Remove the protective plastic from the flush mount trim pieces.
2. Install the two flush mount trim pieces to the oven (see diagram for single and double oven installation.)

NOTE: *There will be a designated right and left hand side flush mount trim piece. Install the corresponding trim piece on the correct side, as they are not interchangeable.*

3. After installing the flush mount trim pieces, the oven can be installed in the cutout.
