571.5mm x 323.9mm x 146mm
Cutout Dimensions: 21 3/4" x 12 3/4" with 3" radius
552.5mm x 323.9mm with 76.2 radius

The Kenyon self-priming alcohol cooktop is very easy to use, just touch a match to the center of the chimney and start cooking, no preheating or priming required. The chimney burner automatically ignites the burner ring holes with heat output that is superior to other standard alcohol burners. The burner is easily controlled by rotating a wheel that extends slightly through the cooktop flange.

On the combination alcohol/electric models, 1100-watt electric cooking elements are provided in addition to the alcohol burner. The electric element is used as the grate for the alcohol burner and pivots up out of the way for easy cleaning. The heat level is adjusted with a separate adjustment wheel.

Single Burner Units

Model B61144

120 V AC 50/60 Hz - 10 amp. - 1100 watts
Single burner, integrated pot retention, black glass lid

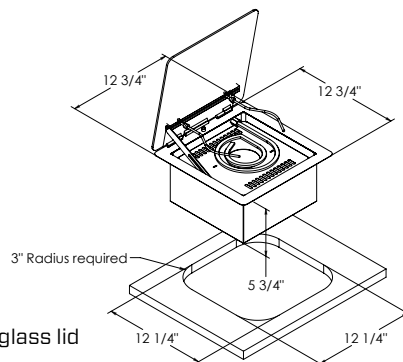

Model B61145
