+ This model is equipped with two LED GU10 lights.

\$ Because the Power Lung&#8482; blower uses centrifugal filtration rather than conventional baffle or mesh filters, the Power Lung&#8482; blower can handle cooking equipment with higher cubic feet per minute (CFM) requirements and can deliver equivalent CFM much more efficiently than other filtration systems. When comparing the Power Lung&#8482; with other blower units made by other manufacturers, use the "Equivalent CFM".

# Ratings in accordance with the Standard Test Code by the Energy Systems Laboratory of the Texas Engineering Experiment Station.
